

Advanced Dental Cosmetic Microsurgery

A Participation Course

October 3 – 4, 2008

at the

American Dental Association Building
Chicago, IL

presented by the

Course Description

Magnification during delicate dental surgery enhances aesthetic results while decreasing healing time, patient discomfort, soft tissue injury and swelling. This two-day participatory course, which is designed for general practitioners and specialists, focuses on basic micro suturing techniques using 6-0 through 9-0 sutures, end-to-end anastomosis for arterial repairs and connective tissue grafting procedures that are aimed at soft tissue repair.

Course Objectives

At the end of the course, the participants will be able to:

- Understand the fundamental principles of microsurgery techniques.
- Use surgical loupes (3x – 6.5x) and microsurgical instruments
- Apply basic suturing techniques using 6-0, 8-0 and 9-0 sutures
- Perform tissue grafting and artery anastomosis procedures.
- Improve the microsurgery techniques used in their practices.

Faculty

Yu-Chuan Pan, MD is the course director. Dr. Pan served as Microsurgery Course Director for Baylor College of Medicine and the University of Texas MD Anderson Center for 15 years and has worked in microsurgery labs at Johns Hopkins Hospital, Mayo Clinic and Lahey Clinics as a microsurgery post-doctorate fellow since 1986. He also has had extensive experience in teaching microsurgery courses for physicians and dentists, both nationally and internationally.

Serge Dibart, DMD and **Ming Fong-Su, DMD**, both of whom are faculty members in the Department of Periodontology, Boston University School of Dental Medicine, will assist Dr. Pan during the laboratory sessions.

About the American Academy of Implant Dentistry:

Founded in 1951, the AAID is the oldest implant organization in the world. Its mission is to advance the practice of implant dentistry through education, credentialing, and advocacy on behalf of patients and practitioners. The AAID promotes both the individual and team approaches to implant dentistry.

The AAID offers the Associate Fellow and Fellow credentials while its sponsored board, the American Board of Oral Implantology/Implant Dentistry (ABOI/ID), offers the Diplomate credential. All three credentials require prior didactic training and clinical experience as well as passing a rigorous examination based on psychometric principles.

For more information about the AAID and its credentialed members, log on to the website at www.aaid.com.
