COVID-19 Vaccine Planning

12/01/2020
Recent COVID-19 Vaccine Announcements

• Pfizer and Moderna have requested emergency use authorization for COVID-19 vaccines to FDA

• FDA advisory committee to meet and discuss both vaccines
  • December 10th Pfizer vaccine
  • December 17th Moderna vaccine

https://www.fda.gov/advisory-committees/advisory-committee-calendar/vaccines-and-related-biological-products-advisory-committee-december-10-2020-meeting-announcement

Vaccine Prioritization

• Initial supplies of COVID-19 vaccine will be limited
  • Requires vaccine prioritization plans

• CDPH current plans based on the national guidance
  • National Academies of Sciences
  • Advisory Committee on Immunization Practices (ACIP)

• Healthcare workers (HCW) first population recommended to receive vaccine
  • HCW who care for COVID-19 patients and perform certain procedures will be prioritized first

**Phase 1**  
- **Phase 1a “Jumpstart Phase”**  
  - High-risk health workers  
  - First responders  
- **Phase 1b**  
  - People of all ages with comorbid and underlying conditions that put them at **significantly** higher risk  
  - Older adults living in congregate or overcrowded settings

**Phase 2**  
- K–12 teachers and school staff and child care workers  
- Critical workers in high-risk settings—workers who are in industries essential to the functioning of society and at substantially higher risk of exposure  
- People of all ages with comorbid and underlying conditions that put them at **moderately** higher risk  
- People in homeless shelters or group homes for individuals with disabilities, including serious mental illness, developmental and intellectual disabilities, and physical disabilities or in recovery, and staff who work in such settings  
- People in prisons, jails, detention centers, and similar facilities, and staff who work in such settings  
- All older adults not included in Phase 1

**Phase 3**  
- Young adults  
- Children  
- Workers in industries and occupations important to the functioning of society and at increased risk of exposure not included in Phase 1 or 2

**Phase 4**  
- Everyone residing in the United States who did not have access to the vaccine in previous phases

---

*Equity is a crosscutting consideration:* In each population group, vaccine access should be prioritized for geographic areas identified through CDC’s Social Vulnerability Index or another more specific index.

---

Update: Preliminary ACIP recommendations

Time
Chicago Department of Public Health COVID-19 Vaccine Planning

- Vaccine allocation to hospitals for vaccination of their employees

- CDPH planning for vaccination of first responders and HCW not affiliated with a hospital or health system

- Vaccination efforts expanded as vaccine supply increases
  - Based on national level prioritization guidance
CDPH gave *guidance* for prioritization among Healthcare Personnel (HCP) to hospitals; explains initial distribution/allocation (specific numbers)

**Initial Vaccine Prioritization Considerations:**

- **Tier 1** – HCP routinely caring for COVID-19 patients/patients under investigation (PUIs) AND performing or attending aerosol generating procedures (AGP).
- **Tier 2** – HCP that may care for COVID-19 patients/PUIs and perform or attend AGPs.
- **Tier 3** – HCP that provide direct care to COVID-19 patients/PUIs but do not generally perform or attend AGPs.
- **Tier 4** – HCP with direct contact with material potentially contaminated with COVID-19 viral particles (depending on hospital protocols, could include phlebotomists, technicians, environmental and dietary services personnel).
- **Tier 5** – HCP that provide direct patient care to patients who are at low risk of COVID-19 and persons with indirect exposure to patients or infectious materials.

**Vaccine Sub-prioritization Considerations:**

- Personnel 60 years of age and older
- Personnel with underlying health conditions who are at increased risk of severe COVID-19 disease

In addition, hospitals may also take into account other factors, including but not limited to mitigation of health inequities, the importance of expeditiously achieving high levels of vaccine coverage among front line staff, and facility level epidemiologic assessment of exposure risk.
CDPH vaccine related communication with hospitals

- Standing biweekly COVID-19 Vaccine Situational Awareness calls
- Multiple calls with hospital Chief Medical Officers
- New this week: call with Chief Nursing Officers
- Task-specific communications
  - COVID-19 vaccine provider enrollment
  - Ultra-cold storage survey
  - Healthcare personnel numbers survey
- Health Alert Network (HAN) written guidance
- Hospital communication team
  - Hotline
  - COVID19Vaccine@cityofchicago.org
Successful Vaccine Rollout

- Team (logistics of staffing vaccine administration, directly and through partners)
- Temperature (logistics of vaccine itself)
- Transportation (logistics of vaccine distribution)
- Training (logistics of training staff for PODs and partners)
- Tech (logistics of facility registration; logistics of individual registration and second dose; logistics of vaccine reporting and facility requests)
- Transparency (comms logistics; data collection and display)
Logistics Examples

- **Temperature/cold chain**
  - Two doses of COVID-19 vaccine, separated by ≥21 or ≥28 days will be recommended for most vaccines.
  - Both doses will need to be the same product.
  - First candidate vaccine (Pfizer-BioNtech) storage requirement is -80c.
  - Second candidate vaccine (Moderna) storage requirement is -20c.
  - Training related to specific handling of vaccine (e.g. diluent, cold chain); additional information will be released as part of the federal approval process.

- **Tech and Data**
  - CDPH has a pre-registration platform designed and used during flu this year.
  - All doses given, regardless of who gives them, must be reported into I-CARE, the state’s immunization registry. The state, in turn, will report to CDC.
  - CDPH is creating a shell vaccine dashboard section to display vaccine administration data at the population level by home zip code, race/ethnicity, age, etc--similar to test data.
**CDPH COVID-2019 Vaccination Clinics**

Target vaccines delivered by City = 250,000 SARS CoV-2 (2 doses)

We have validated four vaccination models during seasonal influenza campaign:

<table>
<thead>
<tr>
<th>Vaccination Site Models</th>
<th>Success / Challenges</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Vaccination Site (POD)</td>
<td>1. <strong>PODs</strong>: good flow, even distribution through-out city, higher volume capable</td>
</tr>
<tr>
<td>2. Mobile Vaccination Site</td>
<td>2. <strong>Mobile</strong>: CTA support, targeted penetration, less volume</td>
</tr>
<tr>
<td>3. Drive-thru Vaccination Site</td>
<td>3. <strong>Drive-thru</strong>: logistically challenging, but works, requires more staff support</td>
</tr>
<tr>
<td>4. Strike Team sites (TBD)</td>
<td>4. <strong>Strike Teams</strong>: outbreak specific</td>
</tr>
</tbody>
</table>
Collaboration with Multiple City Departments

City Depts with critical roles:
- **AIS** (tech, drivers, facility agreements, signage)
- **CCC** (facilities, e-Learning platform)
- **CDOT** (message boards)
- **CPD** (security)
- **CFD** (EMS vaccinators)
- **CPS** (facilities, school nurses as vaccinators)
- **CTA** (buses, facilities, advertising, cleaning)
- **DFSS** (coord w/ shelters & seniors, messaging)
- **DHR** (language skills, volunteer coord, staffing)
- **DSS** (vehicles with drivers, GIS tracking)
- **Law** (policy on liability with staff & volunteers)
- **MOPD** (ADA, ASL interpreters)
- **OEMC** (overall cross-city coordination)
- **Parks** (facilities)
- **PSA** (cost tracking, procurement support)
Partnerships with Additional Vaccine Providers

- Pharmacies
  - Federal long-term care facility/pharmacy partnership
  - Federal expansion of pharmacy partnerships in Phase 2
  - Independent Pharmacies

- Federally qualified health centers and other outpatient providers
  - Enrollment as COVID-19 vaccine providers

- Hospitals and Health Systems
