Editor’s Notebook

David G. Hochberg, DDS
Editor, AAIDNews

Academy’s core values: the education of our profession to better serve our patients. The story will be told by Dr. Terry Reynolds, a past president of the AAID and the originator of the AAID MaxiCourse®. Additional insight and a historical perspective will be provided by Dr. Edward Mills, also an AID past president. He is the director of what is now known as the Regents State University/AAID MaxiCourse® and was originally known as Medical College of Georgia.

We will continue this great story, by featuring in subsequent issues of AAID News, each of the 11 MaxiCourse® programs — six in the United States and five International programs. You will hear from all the directors to get a better understanding of the entire program. In the meantime, page 11 contains a listing of all the MaxiCourses®, including contact information, dates of courses, and links to websites.

The AAID has helped educate and mentor 3,000 dentists in the 27 years since MaxiCourses® were created by the AAID. This is an incredible accomplishment — we should all feel a special pride. A huge thank you needs to be extended to all those involved in the MaxiCourse®, from its inception to the continuation of this educational tradition today.

This is our AAID, and if other dental professionals ask what we stand for, just say “the MaxiCourse®, since 1988!”

The MaxiCourse® in Implant Dentistry

The Beginning and the Evolution

A first person account by Dr. Terry Reynolds

Dr. Terry Reynolds

The MaxiCourse® started as a result of my experiences in giving continuing education courses on implant dentistry and finding that my programs, as well as others, were lacking in information connecting the relevant sciences to the art of implant placement and see MaxiCourse® History p. 10

no more compromises

The Tapered Internal family of dental implants provide excellent primary stability, maximum bone maintenance and soft tissue attachment for predictable results. All implants can be placed with the same instrument kit providing you surgical convenience and flexibility to choose the ideal implants for each patient’s needs. With all these features, you no longer have to accept the clinical compromises that come with other implant systems.

restorative ease
45° conical internal hex connection creates a robust, biologic seal and is color-coded for quick identification and component matching

connective tissue attachment
uniquely creates a physical connective tissue attachment

bone attachment
Laser-Lok® microchannels achieve superior osseointegration

universal surgical kit
intuitive color-coded instrumentation used to place all BioHorizons tapered implants*

*Tapered 3.0, Tapered Internal and Tapered Plus
SMI1315A REV A MAY 2013
Many moons ago, I received formal training in a two-year, full-time residency program in periodontics and implant surgery within a CODA accredited school of dentistry. Upon completion of that training, I was considered a “specialist” in periodontics. To validate that training, I successfully challenged the American Board of Periodontology and became “Board Certified.”

Prior to that, I received formal training in a three-year, full-time residency program in implant dentistry within the same CODA accredited school of dentistry. Upon completion of that training, however, I was only considered a general dentist. To validate that training, I successfully challenged the American Board of Oral Implantology/Implant Dentistry and became “Board Certified.” Yet, I was still considered just a general dentist. The fact is I pursued a residency in periodontics to validate my prior training in implantology — without any regret I should add.

Why did I need to do that to be considered a specialist? Both residency programs were equally rigorous. Both boards had a written and oral examination process and were equally challenging. So what’s the difference? Once again I ask, what is a specialist? And what gives a private, trade organization, like the American Dental Association (ADA), the exclusive right to determine who is and who is not a specialist in these United States?

The American Academy of Implant Dentistry has always been about thinking outside the box. Individually, AAID’s founders and those who followed them, developed creative implant solutions to problems their patients faced. As an organization, we have often done the same. Nearly 20 years ago, when implant dentistry was rejected as a specialty by the ADA house of delegates, the Academy implemented an “outside the box” strategy. We successfully pursued the right to advertise our hard earned credentials through the courts.

At that time, we had the erroneous belief that we would someday be recognized as specialists within the ADA family of dentistry. The American Society of Dentist Anesthesiologists (ASDA), whose members are graduates of CODA accredited, two-and three-year, formal residency programs, who also have a separate specialty board to validate training, and who must also obtain an additional license from the state to practice their area of expertise, also had the same erroneous belief — until they were recently rejected by the ADA house of delegates.

Today, I believe we need to again think outside the box. The right to advertise our credentials is simply not enough. If you are a graduate of a full-time residency program in implant dentistry, you should rightfully be recognized as a specialist. If you are Board Certified by the American Board of Oral Implantology/Implant Dentistry, you should also, rightfully be recognized as a specialist.

The AAID Board of Trustees now believes we should collaborate with other non-recognized dental specialty organizations as well as the existing specialties to develop an apolitical, substitute organization that the states can use to recognize all valid specialty areas of dentistry. This new organization will provide an alternative to the politics of the ADA. Our legal counsel, Frank Recker, agrees.

This is not as far-fetched as you may think. In the

see President’s Message p. 4
President’s Message
continued from page 3

world of medical and osteopathic doctors, there are three organizations that officially recognize specialties — the American Board of Medical Specialties, Bureau of Osteopathic Specialists and the American Board of Physician Specialties. The states defer to these organizations, as opposed to the American Medical Association, for specialty recognition. What makes medicine’s approach different than dentistry is the separation from the politics of any one professional association. Unlike the ADA approach to specialty recognition, the internal and often parochial politics of the American Medical Association and the American Osteopathic Association are not a part of the specialty recognition process. Rather, the determination of specialty status is governed by criteria that are fairly, objectively, and transparently applied. This is significantly different than the ADA, in which the House of Delegates — a purely political body — ultimately can overturn the recommendations that have been carefully investigated by the ADA Council on Dental Education and Licensure, as well as the ADA Board of Trustees — as was recently the case with the American Society of Dentist Anesthesiologists.

To pursue this outside-the-box strategy, we are initially collaborating with three other groups to develop a governance structure, criteria for specialty recognition, and the process for obtaining such status, the administration as well as funding for a new, independent organization. Those groups are the American Society of Dentist Anesthesiologists (ASDA), American Academy of Oral Medicine (AAOM), and the American Academy of Orofacial Pain (AAOP). We will meet over the next several months to flesh out the newly-incorporated American Board of Dental Specialties (ABDS).

We have not only obtained the endorsement from these organizations, but they have committed financial support, over a five-year period, to help this new strategy succeed. Stay tuned for developments.

Free research tool
In other Academy news, the ADA recently decided to close its library. The AAID recognized that there would be a glaring gap in the literature services available to dentists. I am particularly pleased that the Membership Committee, under the chairmanship of Dr. Adam Foleck, recognized a need and came up with an out-of-the-box solution. The AAID is now the only dental organization to provide free, online access to over 400 dental journals and publications, including full-text version of many articles. This is yet another AAID investment made to enhance membership benefit. This access will also improve the quality of our own Journal as it will facilitate article reviews by our editorial staff.

If you haven’t tried this new service, powered by EBSCO’s Dentistry and Oral Sciences Source, I encourage you to so. It is free and easy. All you need to do is log into the members’ section of the AAID web site — www.aaid.com — and enter your e-mail and password. If you don’t remember your password, just click on the “Forgot your password” and you may reset it. If you want help on searching, saving, or obtaining automatic alerts on articles, check out the short training videos we have placed on AAID’s web site.

Outstanding meetings
By the way, if you did not attend the meeting our Central and Western Districts hosted in Chicago in June, you missed two days of outstanding education. The coverage of restoratively-driven implant complications was second to none. And, we honored one of the leaders in dental implant education — Dr. “Duke” Heller — on the occasion of his 75th birthday. Nearly 200 members, non-members and guests were on hand to hear about this giant of a man who realized early on the value of paying it forward.

Lastly, don’t miss AAID’s Annual Meeting, October 23-26, 2013, at the amazing JW Marriott Desert Ridge Resort and Spa in Phoenix. This resort provides unparalleled service, endless recreation, and exquisite dining. This desert mountain luxury hotel, less than 30 minutes from the Phoenix airport, features sweeping views, a pampering spa, outstanding restaurants, and PGA championship golf. The average temperature in late October is in the mid-80 degrees making it a perfect venue for the entire family. The children will love the meandering river flowing through multiple salt water pools.

At this year’s meeting, we will also help you venture outside your own box by adding a new series entitled “International Excellence in Implant Dentistry,” featuring speakers from Latin America, Spain and Mexico bringing a different perspective to topics new and old. Their presentations will be given in Spanish and simultaneously translated to English. In addition, a series of surgeries, broadcast live from multiple locations outside of Phoenix, will be available for your viewing and learning. Audience response systems will also be utilized, which will provide a truly interactive experience. Drs. Jaime Lozada, Michael Pikos, and Matthew Young have created a scientific program that brings you the most creative, forward-thinking clinicians and presentations being offered today in implant dentistry. Don’t miss it. See you in Phoenix!

Business Bite
Systems—Vital to Implant Growth
By Roger P. Levin, DDS

Introduction
Practices that place and/or restore implants without using proven business methods, essentially function at an extraordinary disadvantage. Without efficient systems, doctors often wind up running stressful practices that fail to achieve maximum implant profitability. Conversely, improving business systems creates a more efficient practice capable of reaching implant production targets that previously may have seemed virtually impossible.

Highly productive offices are not achieved by simply tweaking systems periodically. Dentists and specialists cannot take one nugget of information gleaned from an occasional seminar and hope that it will transform their entire practice. Instead, operating the practice efficiently is about using reliable business methods that enable the office to develop into an extremely efficient and highly profitable business.

Many doctors continue to function with outdated systems, which hinder their ability to increase implant production. Practices that appear successful are often operating as much as 30% below their capacity. Fortunately, if the right data-driven systems have been implemented, dentists and specialists can increase implant production exponentially—even in a difficult economy.

Practices should divide each day according to the following equation:
• 65% of daily production should be completed in the morning, and this includes implant surgeries and restorations.
• 35% of production should take place in the afternoon, allowing the doctor and staff to focus more time on implant consults.

The afternoon can also be used to plan for the next day. By segmenting appointments in this fashion, doctors can concentrate on complex cases in the morning when they are “fresh” and enjoy a more casual schedule in the afternoon. Implant case presentations will be more effective when given by relaxed doctors and team members.

Efficient scheduling also calls for the use of 10-minute units. Many practices are still using 15-minute units for their schedules. Inaccurate scheduling can cost a practice approximately 12-15 days of lost treatment time every year, making implant production growth nearly impossible.

2. Collections
In today’s economy, it is more important than ever to have an effective collection process and carefully defined protocols to reduce or eliminate collections over 90 days. Implant cases involve significant fees. When even one implant case goes uncollected, the practice’s bottom line will be affected.

Highly successful practices manage to collect 99% of fees by:
• Establishing a clear, written, documented patient financial management system that is followed by the financial coordinator at all times
• Having the financial coordinator fully trained on the financial options and collection systems
• Submitting dental/medical insurance claims every day
• Creating pre-set times that the financial coordinator works on collecting overdue accounts

“Fortunately, if the right data-driven systems have been implemented, dentists and specialists can increase implant production exponentially—even in a difficult economy.”
• Providing the financial coordinator with value-building scripts for each financial option and overdue account collection calls
• Implementing a documented overdue collection system that is strictly followed until it is evident that patient’s debt is uncollectible

Patients who owe money to the practice should be contacted when they are one day overdue. Patients quickly learn that the practice is on top of its accounts receivable and that they need to make their payments. Make it clear that overdue bills cannot—and will not—be ignored.

3. Marketing

Marketing enables practices to communicate which services are available and why they would be beneficial. The three components of practice marketing are:
• Internal marketing
• External marketing
• Customer service

Internal marketing involves the use of scripting, brochures, posters, collateral materials and other techniques. External marketing includes telephone directory advertising, direct mail, website development, and other efforts. While having an up-to-date website is a necessity, many external marketing efforts fail to generate the desired results for dentists. Customer service encompasses almost every area of the practice, ranging from phone calls to scheduling to case presentation. All practices engage in marketing whether they do it consciously or not.

As dentists and specialists concentrate on implant services, internal marketing becomes increasingly important to practice success. Internal marketing allows the practice to identify and attract the right patients through referrals from existing patients. In addition, internal marketing helps the practice identify more treatment opportunities and increase treatment acceptance rates for active patients.

4. Operations

Operations is a term that refers to the daily running of the practice. It encompasses a variety of activities and indicators, including:
• Number of staff employed
• Length of procedures
• Time of day the charts are pulled or filed
• Closing out at the end of the day
• And many other steps that occur during the normal practice weekday

Although seemingly mundane aspects of the practice, all of these activities (and others) play a significant role for determining whether a practice reaches its implant production goals. Operations determine the level of efficiency in a practice.

Efficiency can only be achieved through proven systems. To determine their effectiveness, systems require measurement. If doctors can measure what they do, it is a system. Success or failure depends on measuring system performance.

5. Training

Any system can be replaced. However, the new system will likely fail if the team does not understand it. Building and training the team is critical to implant success.

Some dentists and specialists blame their teams for poor performance when their practices have failed to provide training for new systems. If a team isn’t given the right tools, the doctor should not expect them to succeed.

Practices can effectively train team members on new systems by:
• Documenting training policies and procedures. Written policies make a tremendous difference and prove invaluable in helping staff members become acclimated to new systems quickly.
• Designating a training day. The purpose of a training day is to highlight key areas in which the team needs to develop additional skills. Using a set agenda, the doctor and team can work together to create an excellent learning experience to guarantee the successful implementation of new systems.

Conclusion

Most practices will outgrow all of their systems over time. As a result, offices trying to build implant services often experience diminished productivity. For practices to reach their potential, they must replace their systems. Achieving a higher level of implant production depends on it.

Practices that used outdated systems in the past could still produce sufficient revenue. In the new dental economy, operating with outdated systems virtually guarantees production declines. Practices that grow their implant services exponentially in an economic downturn are those with effective management systems in place for all facets of the practice. Proven systems enable practices to enjoy remarkable implant profitability—regardless of the slow economy.

To learn how to run a more profitable, efficient and satisfying practice, visit the Levin Group Resource Center at www.levingroup.com—a free online resource with tips, videos and other valuable information. Editor's Note: The cover story in the Spring 2013 issue of AAID News provided information about how the various states allow doctors to advertise their credentials in the American Academy of Implant Dentistry and the American Board of Oral Implantology/Implant Dentistry. In response to that article, several members wrote Dr. Frank Recker, AAID’s legal counsel, for clarification on specific situations. Following is a summary of the questions and answers.

**Question:** I am a periodontist in the great state of New Jersey and I would like to advertise my credentials in the local paper. I have a diplomate with the ABOI/ID and the ICOI as well as a fellowship with the ICOI and the Misch Institute. My question is how do I legally present my credentials to the public without violating state codes.

**Dr. Recker’s Answer:** The trust is protected as are some specific credentials deemed bona fide by several courts. “Specialist in periodontics” or “Diplomate (or Board Certified) by the American Board of Oral Implantology/Implant Dentistry” are acceptable. It also helps to lead the public to the websites for further information (i.e. www.aboi.org). I cannot advise on the other organizations.

**Question:** The doctor is an Associate Fellow of the American Academy of Implant Dentistry. We are wondering if this can be abbreviated to AFAAID, and if not, what is the appropriate abbreviation to add to marketing and stationary.

**Dr. Recker’s Answer:** Associate Fellow can be abbreviated “AF-AAID” or “AFAAID.” There are no restrictions on how you can abbreviate. But obviously the clearer it is, the easier, for someone to understand what it represents.

**Question:** I am an Associate Fellow of the AAID and a general dentist. I have always wondered what I can put on my business cards. Is it okay to put “Implant Dentist” or “Implant Dentistry” or “Implant Surgeon” or “Implant Surgery?” I once asked an attorney who told me that I can put “performing implant services” on my business card. I practice in New York state. I realize this is not a cut and dried situation, but any additional insight you can give me would be greatly appreciated.

**Dr. Recker’s Answer:** Truth is permitted by the First Amendment. The listings you noted in your question are appropriate. In none of them do you claim “implant specialist” or such. And you can say, Associate Fellow, American Academy of Implant Dentistry (or AAID). All general dentists are permitted to perform all aspects of dentistry. You are simply listing one area. And I would note somewhere, “General Dentist,” even if in smaller font than the area of dentistry. Then you can’t be alleged to be implying a specialty status.
NO MORE COMPROMISE!

Until now, choosing a narrow diameter implant often meant a sacrifice in attachment performance and ultimately patient satisfaction. Introducing the LOCATOR® Overdenture Implant System (LODI) featuring LOCATOR, the world’s leading overdenture attachment.

The unique two-piece coronal design of LODI, not found with O-Ball mini implants, is a critical feature that optimizes patient satisfaction. The LOCATOR attachment is seated after implant placement making case planning, implant surgery and restoration easier and allowing for replacement if wear should occur throughout time. LODI is manufactured from the strongest titanium available, features a proven RBM surface and is designed to provide exceptional primary stability when immediate loading may be indicated.

The LOCATOR Attachment provides all of the superior benefits known worldwide including its patented pivot technology, customizable levels of retention, and draw correction of divergent implants up to 40 degrees. All of this while having a dramatically reduced vertical height compared to O-Ball mini implants.

I knew that such a program would take a massive effort, and to guarantee success, the program would have to be all inclusive, thus “MaxiCourse®.” It would also have to be university-affiliated to add stature and AAID affiliated to help give the Academy stature as we were beginning to compete for specialty status.

My opportunity came when I became a member of the AAID’s specialty application committee. During one of the meetings, we were addressing the requirements for specialty, one of which was to have a comprehensive teaching program that was qualitative and was already under way. I volunteered to take on that particular project for the Academy. I don’t think that anyone thought I would do all that was needed. That made it all the more appealing to me as a challenge.

I first composed the course using 300 hours of both didactic and participation because that was the required number of hours that the AAID required a doctor to have to qualify for taking its exam. I sought physicians and scientists who specialized in the related science areas such as anatomy, bone physiology, internal medicine, and pharmacology. I met with them and discussed how they needed to compose their presentations so that they would be relevant to implant dentistry. I asked them to put the presentations into a syllabus, which they all did. I then solicited dental labs, implant manufacturers, and implant dentists to put together presentations on the various implant modalities that were being used (this was before the root form implants gained popularity). We covered everything related to diagnosis, treatment planning, surgical placement, grafting, and restoration of oral implants.

I was then ready to approach a university. Since I lived in Georgia, I decided to approach the Medical College of Georgia. I arranged a meeting with the Director of Continuing Education and the Dean. I told them what I wanted to do. They felt it was a great idea. I told them that we would split the profits 50/50 and that I was going to donate my half to the AAID, which I did for the seven years that I directed the course there. After serving as President of the Academy, I was joined by Dr. C. Benson Clark. Together we started a new MaxiCourse® at Howard University in Washington D.C., which was also successful. Dr. Ed Mills took over the directorship of the Medical College of Georgia MaxiCourse®. The three of us donated our share of the profits from those programs for years until very recently. This means that among the three of us, hundreds of thousands of dollars were donated to the Academy.

I am very proud of the progress that the course has made over its 27 years of existence. There are now eleven AAID-approved MaxiCourses® worldwide. It has grown AAID’s membership considerably and enhanced our financial status. I think, however, that the most outstanding accomplishment achieved by the MaxiCourse® was to help establish the credentials of the Academy as authoritative. This helped the AAID in see MaxiCourse Evolution p. 12
MaxiCourses®

AAID’s MaxiCourses® are among the most respected and comprehensive training programs in implant dentistry.

MaxiCourses® provide 300 or more hours of lecture, laboratory sessions, live surgical demonstrations and home/office assignments.

This course is a must for all general dentists, periodontists, prosthodontists and oral surgeons who want to be proficient in implant dentistry and a great way to begin the process of becoming an Associate Fellow Member of the AAID.

Below is a listing of all AAID MaxiCourses®, which is organized in three sections: MaxiCourses® in the United States, MaxiCourses® in Canada, and MaxiCourses® in Other Countries.

**Summer 2013**
The courts as we attained the right for implantologists in most states to advertise their credentials in the AAID. This is the main thing that we wanted from specialization.

The only disappointing aspect of the MaxiCourse®'s evolution has been that it has moved away from the multi-modality approach in an effort to make the single modality (root forms) a panacea. There was a time when that was justified, but that approach is no longer valid. Most of the challenging issues with other modalities, such as subperiosteal implants, have been resolved. Those modalities have become highly predictable, less invasive, less expensive, and take less time to restore. I feel that, while our practitioners may choose to use a particular modality over another, the practitioner should be very knowledgeable and capable of restoring with any viable modality because their AAID — as the premier implant organization in the world — credentials validate them as experts. Experts should not be unjustifiably limited.

implantology was available only at a limited number of full-time residency programs at Harvard University, Loma Linda University and at Brookdale Hospital in New York. Harvard Dental School and the Alabama Implant Study Group also provided continuing education programs that over four sessions that addressed the basics in dental implantology.

Dr. Reynolds believed that a much larger educational scope was needed and presented a 300-hour university-associated program to the AAID, as well as to the Medical College of Georgia.

Dr. Reynolds ran the program at the Medical College of Georgia and then hand-selected me to become the new director of the program. Then, Dr. Reynolds, along with Dr. Benson Clark, developed another MaxiCourse® at their alma mater, Howard University.

The faculty had expanded to over 30 clinicians, including specialists in all aspects of dentistry and medicine. At least one-third of the faculty have double degrees, and since the program began, all have agreed to share their

see MaxiCourse® History p. 13
AAID Membership Ambassadors

AAID Membership Ambassadors know first-hand how membership in the Academy helps dentists establish or expand their expertise in implant dentistry and encourage their colleagues to join the AAID.

We would like to thank the Membership Ambassadors who have referred colleagues as new members between April 1, 2013 – July 1, 2013.

Thank you for referring one colleague to the Academy.

Burt Balkin, DMD, from Philadelphia, PA
Gordon J. Christensen, DDS, MSD, PhD from Provo, UT
Jay Elliott, DDS, from Houston, TX
Dennis Flanagan, DDS, from Willimantic, CT
Richard Gens from Baltimore, MD
Richard A. Guaccio, DDS from Schererville, IN
Dr. Nazik Salah Eldin Haj Ali, BDS from Al Ain, United Arab Emirates
Shankar Iyer, DDS, MDS from Elizabeth, NJ

Mohammad A. Kasem, DDS from Ocoee, FL
Richard Leong, Jr., DDS from Melbourne, FL
Dr. Kelvin Lim, from Kuala Lumpur Malaysia
John C. Minichetti, DMD from Englewood, NJ
Terry F. Rigdon, DDS from Tulsa, OK

Would you like to be an AAID Membership Ambassador?
Simply encourage your colleagues to join the AAID. Offer your colleagues a discount on their first year’s membership dues by having them specify your name in the “How did you learn about the AAID?” section of the membership application. Your colleague saves $100 off their 2013 dues by simply placing your name on the referral line ($245, regularly $345.) Or if they join after July 1 for the remainder of the year, they can save $50 ($150, regularly $200.)

If you would like to request membership applications, contact Carolina Hernandez in the Headquarters Office at carolina@aaid.com.

DR. HOCHBERG: I understand that you recently transitioned your practice model. What was the “old” model?

DR. GIMER: I was a sole proprietor for most of my 33 years in private practice here in Iowa Falls. I had a brief experience — about six years — with a second dentist in the office; but I have practiced alone since 1990. We have a complete general practice, offering all dental services to all ages of patients. We’ve been providing orthodontia services for 30-plus years, and implant surgery and restorative for 25-plus years.

DR. HOCHBERG: What were the reasons for your decision to pursue a change?

DR. GIMER: When I turned 60 years of age, I had my practice appraised, and then listed for sale or associate. I was planning to go through the process of identifying a successor for my practice. However, we are a small community (5,200 population) with an expanded service practice model, and we did not receive much interest. After six to eight months, my broker contacted several corporate dental practice management companies, and I was approached by two of these. After some deliberation, I agreed to proceed with an interview process.

DR. HOCHBERG: Did those companies make you an offer?

DR. GIMER: Both companies offered up-front to pay the full appraised value for my practice. One company offered a covert operation, with no change in our office business model, signage, stationery, etc. They offered a marketing budget and a facility update in the first year. We already used the same office software and digital x-ray programs preferred by this company, so there were no significant changes needed to blend with their corporate model. The second company preferred an overt take-over, with signage and stationery for their company. They would require a software change and digital x-ray change. Company #2 appeared much more heavy-handed in their management approach, but they indicated the office appearance looked fine the way it was.

Both companies offered me the opportunity to continue to practice for as long as I wanted. This was important to me, as I was not ready to retire. Both offered a commission-based compensation model, and payment of a portion of lab expenses. There were differences in the commission percentage, in the lab percentage, lab choice (restricted vs. unrestricted), and budget management.

I decided to proceed with negotiations with Company #1.

DR. HOCHBERG: Why did you choose this company over the other?

DR. GIMER: I was more at ease with their hands-off approach. They offered a higher commission rate, and a higher percentage of lab expenses. No changes were required in our office software, which was a huge issue for me. We have full electronic records, and had

Building where Dr. Gimer’s practice is located in Iowa Falls, IA.

Interview
continued from page 14

just converted our software a year previous. We were in no hurry to do this again. Also, the offer to upgrade the facility décor was a big selling point.

**DR. HOCHBERG:** What selling point.

**DR. HOCHBERG:** What path did your due diligence and negotiating process take?

**DR. GIMER:** The initial contact occurred in early December or late November. Since our practice appraisal had already been done, we were able to proceed fairly rapidly. By Christmas I had made up my mind that this type of transition was right for me, and I communicated my desire to move forward in early January.

It was very important to me that my staff remained with me, and that no one would go backwards in compensation. I also wanted to continue to travel for continuing education (like the AAID Annual Meeting) and to take my entire staff to at least one of these meetings each year. So I negotiated a CE budget consistent with our CE expense average over the last five years.

As the owner of office building, we negotiated a five-year lease consistent with dental office space rental. Once these and other minor negotiation points were reached, and an acceptable split between goodwill and equipment allocation was determined, we were ready to finalize the deal. Our closing date was in late April, and the new practice ownership date was May 1, 2011.

**DR. HOCHBERG:** You said that you wanted to retain your staff. How have they reacted to the change?

**DR. GIMER:** I informed my staff members of this confidential offer very early in the process. I wanted them to be aware that their jobs were secure, and there would always be a practice to employ them, whether I was the dentist, or someone else. Also, I'm very aware that a fall, an illness, a car accident, or other situation could shutter my practice immediately. Having a back-up organization is (would be) insurance for all of us.

It would be safe to assume there was some level of anxiety amongst my staff members as to changes that might occur in the transition. However, other than punching the clock as opposed to salaried compensation, there have been very few changes. Everyone now has health insurance, other insurance, dental benefits, 401K retirement plan, and flex plan available should they choose. We all have to request time off, which is a lot more formal that I was used to!

**DR. HOCHBERG:** What was the initial transition period like?

**DR. GIMER:** Our transition period was rather uneventful. About two weeks in advance of the formal change, a team of two or three representatives from the company come to the office and met with all of us to answer questions, present benefits opportunities, review HR and OSHA requirements, and just basically provide a face to a name for future communication.

**DR. HOCHBERG:** What about now? How involved is the company?

**DR. GIMER:** Once or twice a month someone drops by, or uses a back office computer to do some insurance or collections work. We have had mandatory presentations for OSHA, sexual harassment, etc., but other than that, very little on-site presence. E-mail and telephone contacts pretty much take care of our corporate contacts. Daily reports are generated and faxed; receipts and expenses are mailed to the home office. Occasionally, the accountants call to ask a question, but overall there has been a very easy transition for our office. They kept their promise of an update for my office building, which turned out very nice.

**DR. HOCHBERG:** Now that you have been practicing with the new model for some time, what do you believe are the pros and cons of having made the transition?

**DR. GIMER:** For me, the pros vastly out-weighed the cons. I had no legacy to continue, and virtually no prospects for buyers. I dreaded the dice game of finding an associate, the courtship, and the eventual purchase of the practice. I've seen so many of my colleagues have difficult transitions. I knew that even if the practice did sell to an individual, the emotional and ethical aspects of a transition could be very problematic. This offer gave me the opportunity to continue to practice, as long as I wanted, with my own staff, and to write my own end game. As I evaluated my prospects, I came to view this as my best-case scenario.

**DR. HOCHBERG:** Would you do anything differently?

**DR. GIMER:** If I were a better negotiator, I probably should have asked for more money, or negotiated a higher commission percentage, or something like that. I'm still not totally sure how my pre-sale and
and salary adjustments are mine to tweak.

**DR. HOCHBERG:** Anything else you would like to share with our readers?

**DR. GIMER:** From my perspective, there has been no change in how I operate, and I have no financial worries. Like most of us, I care deeply about my patients and what lies ahead for them. Working out this endgame is still my biggest concern, but the financial aspect is behind me. I had to watch my parents close the door on their business, unable to find a buyer. I was mindful of that possibility for a long time, and this opportunity gave me the financial reward for the practice I had built, and the peace of mind to continue on my own terms.
**AAID 2013 ByLaws Committee Report**

### Proposed Amendment — “Aaron Gershkoff-Norman Goldberg Memorial Award”

Article V, Organization of the Academy, Section 6, Past Presidents’ Council. Subsection A, by updating the name of AAID’s Gershkoff award to add the name of Norman Goldberg, AAID’s first president. The award would be called “Aaron Gershkoff-Norman Goldberg Memorial Award.”

### Rationale

To recognize the recent passing of AAID’s first president, Dr. Norman Goldberg, the Board of Trustees together with the Past Presidents’ Council, have agreed to add Dr. Goldberg’s name to AAID’s most prestigious award. It is a fitting way to pay tribute to the first and second presidents of the Academy.

### Amendment

Amend Article V, Organization of the Academy, Section 6. Past Presidents’ Council

A) With the approval of the Board of Trustees, the Past Presidents’ Council shall select the annual recipient of the AAID Aaron Gershkoff-Norman Goldberg Memorial Award, to be presented at the Annual Meeting.

### Summary of Actions Taken by Board of Trustees

**June 8, 2013 — Chicago, Illinois**

- **PARTICIPATE in planning** stages of proposed American Board of Dental Specialties
- **SUPPORT efforts to allow use of AAID credentials** in advertising in British Columbia and allocate up to $10,000 for legal counsel
- **ACCEPTED 2012 Audit** as presented
- **APPROVE 2013 audit engagement** with Ruzicka & Associates
- **TRANSFER $500,000 to AAID Reserve Fund**
- **RETAINED** JP Morgan as investment advisor for 2013
- **ELECTED** 51 Associate Fellows by examination, 11 by credentials; 3 Fellows by examination and 22 by credentials
- **INCREASE by $100 the application fees for examinations**
- **ADD $250 processing fee** for Part II, oral case examination
- **ESTABLISH fee of $1,600** for the first international teleconference of oral examination
- **REMOVE delinquent credentialed members from membership**
- **APPROVED Life Membership** for Dr. Michael Mooney
- **CO-SPONSOR** 5th International Dental Facial Conference, November 8-9, 2013, in Dubai
- **IDENTIFY** an ABOI/ID and/or ABOM Diplomate in Kentucky as plaintiff in new legal action

- **Members of the AAID Bylaws Committee** included Drs. John Minchetti, Chair, Thomas Chess, Kim Gowey, and John Da Silva.

  Voting will take place on Saturday, October 26, 2013, in Phoenix, during the Annual Business Meeting from 2:00 pm until 4:00 pm.

---

**Upcoming Key AAID Dates**

**A U G U S T  2 0 1 3**

- **23-25** AAID Global Conference and 9th WCOI (World Conference for Oral Implantology) Seoul, South Korea

**O C T O B E R  2 0 1 3**

- **23-26** 62nd AAID ANNUAL MEETING Phoenix, AZ

**N O V E M B E R  2 0 1 3**

On July 18, 2013, U.S. Food and Drug Administration’s Dental Products Panel of the Medical Devices Advisory Committee held a hearing to discuss and make recommendations on the proposed regulatory classification for dental devices known as Endosseous Dental Implants (Blade-form), one of the remaining preamendments Class III devices.

Earlier in the year, the FDA issued a proposed order (FDA-2012-N-0677) which, if made final, would reclassify the blade-form endosseous dental implant into class II (special controls).

The committee recommended re-classification of these devices into Class II and commented on whether the proposed Special Controls are adequate to reasonably ensure the safety and effectiveness of blade-form endosseous dental implants.

Scan the QR Code to access the FDA’s detailed research on blade-form implants or visit www.aaid.com/news_and_publications/75.
In Memoriam

Douglas Patrick, Partner, Vice President and CFO, Aurum Group of Companies, 1947 - 2013

It is with great sadness that the management and staff of the Aurum Group of Companies announce the sudden passing of Doug Patrick at the age of 65 years on Monday, May 6, 2013, in Calgary, Alberta.

Doug joined The Aurum Group of Companies (Aurum Ceramic Dental Laboratories, Space Maintainers – Pacific Northwest Dental Laboratories and Cerum Dental Supplies) in 1978 and had been with the company since that time, achieving the level of Vice President and CFO as well as becoming a Partner.

Over his dental career of more than 35 years, Doug had a long history of service to the industry including Past President of the Dental Laboratory Conference, and Past Directorships with the American Dental Trade Association, the Dental Industry Association of Canada (DIAC) and the Canadian Dental Association’s Dentistry Canada Fund.

For further information, contact: Mr. Bernie Teitelbaum, Executive Director, Dental Industry Association of Canada. Telephone: 905.417.7462 Email: bernie@diac.ca

Recent Canadian Dental Graduates Taking Longer To Set Up Practices

Based on tracking a long-term trend, recent Canadian dental graduates appear to be taking longer to set up their practices than those who graduated in past decades, according to results from the DIAC (Dental Industry Association of Canada) Seventeenth Annual Future of Dentistry Survey.

While in the past (based on responses from those with 16 or more years in practice), the vast majority of these earlier dentists first set up in practice within the first 3 years, this percentage for newer graduates (0-3 years) has been dropping steadily since 2008 from around 40% at that time to 22% in 2011, 18% in 2012 and 11% in 2013.

As might be expected, there has also been a movement to later set-up with those who graduated 4-9 years ago as well, although a far higher percentage of this group were able to set up in their first three years after their graduation. As we move up the scale in terms of years in practice, we see that noticeably higher percentages of these “older” groups were able to set up their own practice within 3 years of actually joining the profession (culminating with 50 – 65% of those who have over 20 years in dentistry being able to set up within three years of their graduation).

While it is not certain exactly why this has happened, it may be extrapolated that this has been a function of the recent poor economy’s impact on patient loads combined with the rising costs of education and practice set-up. Perhaps in conjunction with this delay in practice start-up, there is a decline in sole practitioners (37% versus 44%) over the past five years, matched by an increase in practices with one additional dentist (32% versus 26%) and larger practices with four or more dentists (8.9% versus 5.9%). There has also been a subtle movement to practices with greater numbers of operators. Both may well be a function of shared expenses or as an exit strategy for the older dentist.

Almost 1000 practicing Canadian dentists responded to this year’s survey (similar to the response achieved over each of the previous fifteen years) with a good proportional distribution across all regions of the country. Based on this response rate, overall 2012 survey results have an accuracy of +/- 3.08% 19 times out of 20.

Gendex Launches the Family Scrapbook Photo Contest

This year, Gendex proudly celebrates “120 Years of Imaging Excellence” honoring a legacy of remarkable accomplishments that have helped shape today’s dental imaging by delivering continuing innovation, dependable performance, and comprehensive solutions.

To mark this key milestone, Gendex launched a social media photo contest: the Gendex Family Scrapbook. The contest encourages Gendex owners to submit pictures of their staff using Gendex products and share them with their Facebook community to receive votes. The photo with the highest number of votes received by midnight on November 1, 2013, will be declared the winner of the Gendex Family Scrapbook contest.

Overflow crowd attends AAID’s Central and Western Districts’ Meeting

Nearly 200 doctors and guests attended AAID’s Central and Western Districts meeting held in Chicago early in June. In addition to learning about restoratively-driven implant complications, they gathered for a dinner to honor Dr. Alfred “Duke” Heller for his contribution to implant dentistry education.

Dr. Frederick Gustave and the Central District officers put together an outstanding program that provided in-depth coverage of the causes, prevention, and treatment of restoratively-driven implant complications.

Attendees learned how decisions contribute to subsequent implant failures and how to identify common fixed-prosthetic complications. Presenters discussed various approaches to address prosthetic complications and how to manage cases to avoid restoratively-driven implant failures. Other speakers presented programs on the use of technology including lasers, 3D, and digitally-guided surgery and treatment planning to treat or avoid failures.

Seventeen companies exhibited at the meeting, which attracted doctors from throughout the country. Sponsors included OCO Biomedical, Rocky Mountain Tissue Bank, and Tatum Surgical.

Mark your calendar for March 14-15, 2014, and plan to join your colleagues in San Francisco for “Treatment Planning to Minimize Failures” hosted by AAID’s Western District.

Industry News continued from page 21

The winner will then have the opportunity of naming a dental charity of his/her choice to receive a digital intraoral x-ray package donated by Gendex. The package, valued at over $15,000, includes the award-winning GXS-700™ digital sensor. The 501(c) dental charity selected by the winner will be presented with the donation at a ceremony held during the 2013 Greater New York Dental Meeting. Eligible charities can encourage their supporters who own Gendex products to participate in the Gendex Family Scrapbook photo contest. Detailed information about the program can be found on the Gendex Facebook page. Participants can also receive contest updates on Twitter using the hash tag #Family Scrapbook.

The Family Scrapbook photo contest is one of several initiatives launched to celebrate Gendex’ legacy, a story that can be traced back to 1893 with C.F. Samms and J.B. Wantz, founders of Victor Electric. Today, Gendex is a global leader in intraoral and extraoral dental imaging. With a product line that ranges from intraoral sensors and cameras to 3D cone beam scanners, and digital panoramic to imaging software, Gendex offers dental professionals a wide range of comprehensive imaging solutions.

For more information on the program, please visit www.facebook.com/gendex.

www.aaid.com
President-Elect John Minichetti, DMD is seeking Academy members who are interested in serving on AAID committees for the 2013-14 year. Generally, committees meet via phone conference call. Some committees meet in person, usually at the AAID Headquarters in Chicago. If you are a member of a committee that requires an in-person meeting, the Academy will reimburse you for coach airfare, hotel for one-night, transportation between airport and home or the meeting location, and provides a per diem. Credentialed and General Members alike are invited to serve on committees. Only Credentialed members may hold the position of chair of a committee.

Following is a list of available committees and a brief description of their responsibilities.

**Education**
The Education Committee shall strive to ensure that any Academy member engaged in any educational effort affecting implant dentistry shall conduct the program consistent with the highest professional standards, presenting appropriate and competent material with due regard to the recipients of the information dispensed. A sub-committee of the Education Committee focuses on planning the scientific programs at the AAID Annual Education Conference.

**Ethics**
The Ethics Committee shall maintain the Academy's high ethical standards and assist, guide, and correct the Academy and its members, as indicated or necessary to conform to the standards.

**Membership**
The Membership Committee shall plan and establish a program of increasing all classifications of membership in the Academy.

**Public Relations**
The Committee is charged with developing public relations’ strategies and implementing the strategies to obtain desired exposure of the Academy.

**Global**
The purpose of the Committee is to enhance the art and science of multimodal implant dentistry throughout the world.

Send an e-mail by September 1, 2013 to Sharon Bennett, Executive Director of the AAID, at sbennett@aaid.com to indicate your interest in serving.
Micro Rings
Improve the bone to implant contact at the crestal zone by increasing surface area.

Dual Thread Design
Allows for faster insertion, reduces heat generated, and reinforces osseointegration.

Surface Treatment
Creates an osseoconductive morphology and achieves superb osseointegration results.

Domed Apex
Prevents over-insertion for safer implant placement procedures.

A UNIQUE IMPLANT
MAKE IT SIMPLE

Priced at $175.00, each SEVEN® implant is packaged with a cover screw and a single-use final drill, allowing a safe and accurate drilling procedure. To learn more, visit our website: www.misimplants.com or call us: 866-797-1333

* Includes one (1) President’s Celebration ticket

B. INTENSIVE COURSES

Each Workshop is $99 if registration received by 9/17/13 ($119 after 9/17/13), unless otherwise noted.

□ E1: Contemporary Moderate Sedation - Michael Mazini, DDS (Th. am)

□ E2: Management of Compromised Implant Prosthesis Treatment - Edward Michael Amet, DDS,MS (Th. am)

□ E3: Surgical Techniques Including Instrument Handling and Suturing - Stuart Oron Jones, DDS (Th. am)

□ E4: Immediate Implant Placement and Socket Preservation Using Bi-Phasic Calcium Sulfate BoneGraft® - Daniel Brunner, DDS,MS (Th. am)

□ E5: Retirement Planning for Doctors - Michael VonElders (Th. am) NO CHARGE

□ E6: The Sinus Grafting Practical Workshop - Stuart Oron-Jones, DDS (Th. pm)

□ E7: Intraoral Access - Practice - Michael Mazini, DDS (Th. pm)

□ E8: Mandibular Subperiosteal Implant. The Triplanar Design - Leonard L. Unci, DDS,MD (Th. pm)

□ E9: Incorporating Lasers into Implant Dentistry - Georges E. Romanos, DDS,MD,PhD (Fri. am)

□ E10: Hands-on Course in Maxillary Sinus Elevation - Stephen Wallace, DDS (Fri. am)

□ E11: Computer-Guided Implant Treatment - Aliadin Al-Awadi, DDS,MS (Fri. am)

□ E12: Implant Site Preparation and Bone Augmentation in the Mandible - Jay Seo, DDS (Fri. pm)

□ E13: Enhanced Implant Placement: From Immediate Extractions to the use of P.L.R. - Jack T. Krauser, DMD and Robert Miller, DDS, MA (Fri. pm)

□ E14: Overcoming the Common Fears that Investors Make - David Cheung (Fri. pm) NO CHARGE

□ E15: Classification of Extraction Site Defects. Practical Guidelines for Implant Site Development - Joseph A. Lazzatti, DMD,FAI (Fri. pm)

□ E16: Bototox and Dermal Fillers - Pankaj Singh, DDS (Sat. am)

□ E17: Vertical Ridge Augmentation – Hands-on Workshop - Ishan Ulat, DMD, MD (Sat. am)

□ E18: Bone Manipulation - Richard A. Borger, DDS and Jerome Poronin, DDS (Sat. am)

□ B. Intensive Courses subtotal

C. DENTAL TEAM TRAINING

All Dental Team Training programs are FREE OF CHARGE. However, we want to obtain an idea of how many to anticipate for the two simultaneous programs on Friday morning. Please indicate your preference:

□ DT1: Hands-on Surgical Program for Allied Team Members (Fri. am) NO CHARGE

□ DT2: Hygiene: Dental Implant Knowledge Base – The Role of the Allied Dental Staff (Fri. am) NO CHARGE

D. SPECIAL EVENTS

□ ABID/D Luncheon (Thu. Noon – 1:30 pm) $75

□ A & C Roundtable (Thu. 10:00 am – 11:00 am) NO CHARGE, but reservation required

□ A & C Roundtable (Fri. 10:00 am – 11:00 am) NO CHARGE, but reservation required

□ First Attendee/Student Reception (Wed. 5:30 pm – 6:15 pm) NO CHARGE

□ Women Dentists Wine & Cheese (Fri. 6:00 pm – 7:30 pm) NO CHARGE, but reservation required

□ President’s Celebration (Sat. 9:00 pm) $195

□ D. Special Events subtotal

**SCIENTIFIC PROGRAMS AT A GLANCE**

### Friday, October 25

#### MAIN PODIUM
- **ALL DAY**
- **TECHNOLOGY**
  - CAD/CAM Abutment and Framework Fabrication
    - Lyndon Cooper, DDS, PhD
  - Computer Assisted Implant Dentistry and Predictable Success
    - David L. Guichet, DDS
  - CAD/CAM Fabricated Complete Dentures: Benefits and Clinical Applications
    - Charles Goodacre, DDS, MSD
- **REGENERATION AND BIOLOGICS**
  - BMP-2-Induced Alveolar Augmentation/Osseointegration: A New Standard?
    - Ulf Wikesjo, DDS, DMD, PhD
  - Scientific Rationale and Practical Clinical Applications of PRP, PRF, and Recombinant Growth Factors
    - James Rudkowski, DMD, PhD
  - Innovations for Esthetic Implant Surgery with Growth Factors
    - Marc Nevin, DMD, MMSc

#### INTENSIVE COURSES
- **MORNING 8:00 am – Noon**
  - IC9: Incorporating Lasers into Implant Dentistry
    - Georgios E. Romanos, DDS, DMD, PhD
  - IC10: Hands-on Course in Maxillary Sinus Elevation
    - Stephen Wallace, DDS
  - IC11: Computer-Guided Implant Treatment
    - Aliadin Al-Ardah, DDS, MS
  - IC12: Implant Site Preparation and Bone Augmentation in the Maxilla
    - Jay Sison, DDS
    - MIS Implants Technologies, Diamond Sponsor
- **AFTERNOON 1:30 pm - 5:30 pm**
  - IC13: Enhanced Implant Placement: From Immediate Extractions to the use of L-PRF
    - Jack T. Krauser, DMD and Robert Miller, DDS, MA
    - Intra-Lock International, Presidential Sponsor
  - IC14: Overcoming the Common Errors that Investors Make
    - David Chong
  - IC15: Classification of Extraction Site Defects; Practical Guidelines for Implant Site Development
    - Joseph A. Leonetti, DMD

#### LIVE SURGERY
- **BROADCAST LIVE FROM PHILADELPHIA, PA**
  - **MORNING 8:00 am – Noon**
    - **Teeth-in-a-Day®**
      - Thomas J. Balshi, DDS
      - Stephen F. Balshi, MBE
  - **AFTERNOON 1:30 pm - 3:00 pm**
    - **Vertical Augmentation Surgery**
      - Istvan Urban, DMD, MD

#### DENTAL TEAM TRAINING
- **MORNING 8:00 am – Noon**
  - DT1: Auxiliary Utilization in Implant Surgery and Bone Grafting
    - Jack Piermattei, DMD
    - Loni Kline, CDA, RDA
  - DT2: Hygiene: Dental Implant Knowledge Base: The Role of the Allied Dental Staff
    - Shirley A. Lee, MS, RDH
    - Kristi Wilkins, RDH

### Saturday, October 26

#### MAIN PODIUM
- **MORNING 8:00 am – 12:10 pm**
  - **MANAGEMENT OF CLINICAL DILEMMAS**
    - Restoratively Driven Implant Complications: “Implant Dentistry’s Dirty Little Secret”
      - Alfonso Pineyro, DDS
    - Peri-implantitis Etiology and Treatment - An Evidence-Based Approach
      - Hom-Lay Wang, DDS, MS, PhD
    - Clinical Realities and Complications of Zirconia Based Restorations
      - Howard M. Chasolen, DMD

#### INTENSIVE COURSES
- **MORNING 8:00 am – Noon**
  - IC16: Botox and Dermal Fillers
    - Pankaj Singh, DDS
  - IC17: Vertical Ridge Augmentation – Hands-on Workshop
    - Istvan Urban, DMD, MD
  - IC18: Bone Manipulation
    - Richard A. Borgner, DDS
    - Bernee Dunson, DDS

AID makes it easy for you to find the programs that interest you the most. Search all courses by type of program, keywords, or AGD Subject Code.

2:00 pm – 4:00 pm  AAID Business Meeting
6:00 pm  Reception, President’s Celebration Dinner and Dancing
Camaraderie and Networking Opportunities

CONTINENTAL BREAKFASTS
Start each day of the meeting on the right foot with a continental breakfast. This is an excellent opportunity to share information with your peers before attending a scientific program. Continental breakfasts are open only to registered attendees. Badges will be required.

NETWORKING/REFRESHMENT OPPORTUNITIES
Take a break from formal learning to continue discussions with colleagues during the twice-daily refreshment breaks. Examine what is available to the implant dentist at the Implant World Expo in the Exhibit Hall. Enjoy refreshments while sharing information with colleagues and suppliers. Badges will be required.

FIRST-TIME ATTENDEE/STUDENT RECEPTION
Wednesday, October 23
All First-Time Attendees and students are invited to learn how to maximize their experience at the AAID Annual Meeting at this special reception. The leaders of AAID will be present to answer questions and will be available throughout the meeting as resources and mentors. The event will be held on Wednesday, October 23, 2013 from 5:30 pm until 6:15 pm. Afterwards, First-Time Attendees and students are encouraged to attend the Welcome Reception and meet more members of the AAID. Badges will be required.

WELCOME RECEPTION
Wednesday, October 23
All registrants and registered guests are invited to attend the Welcome Reception on Wednesday, October 23 from 5:30 pm until 7:00 pm. This is a wonderful opportunity to reconnect with old friends and make new ones from the implant profession in a relaxed atmosphere while enjoying light appetizers and beverages of your choice. Badges will be required.

Implant World Expo Lunches — 2 Lunches
Thursday, October 24 and Friday, October 25
No need to look for a restaurant, worrying if you will be finished in time for the start of the afternoon education session. Join your colleagues on Thursday, October 24 and Friday, October 25 from 12:10 until see Networking p. 20
Bask in the Valley of the Sun

The AAID has chosen a resort that provides unparalleled service, endless recreation and exquisite dining. This desert mountain luxury hotel, less than 30 minutes from the Phoenix airport, features sweeping views, a pampering spa, outstanding restaurants and championship golf. Upon arrival, you’re greeted with an expansive grand lobby, splashing fountains, stunning floor-to-ceiling windows, sparkling waterways and majestic palm-lined pathways. Resort suites and hotel rooms include views, signature bedding and balcony or patio.

Take advantage of AAID’s block of rooms and be just an elevator ride away from all programs and activities of AAID’s Annual Meeting. Call JW Marriott at 1-800-835-6206 or 1-480-293-5000 and mention the American Academy of Implant Dentistry for special group rates of $286 plus tax for single or double occupancy. Visit www.aaid.com for more information and to reserve your room online. Or scan the QR Code to go directly to the reservation site.

Networking continued from page 5

1:30 pm in the Exhibit Hall for a FREE lunch and visit with the suppliers who help make your practice successful. Every registrant will receive a ticket for lunch.

IMPLANT WORLD EXPO RECEPTION
Thursday, October 24
Join colleagues and suppliers to the implant profession in the exhibit hall for the Implant World Expo. Over 120 suppliers to the implant dentistry profession will be there. Chat with fellow professionals while enjoying hors d’oeuvres and cocktails. This outstanding event is open to all registered guests (badge required) and will be held from 5:30 pm until 7:00 pm on Thursday, October 24. Badges will be required.

DISTRICT CAUCUSES LUNCH
Friday, October 25
Meet your fellow members who practice in the same geographic area and enjoy a box lunch while discussing AAID business. This event is open to all AAID members — credentialed or general — although, only credentialed members may cast votes. This is an excellent way to become involved in the workings of the Academy and develop new contacts in the profession. Each District will meet in a different room for lunch and conversation on Friday, October 25 from 12:10 pm until 1:30 pm. There is no cost for this event. Pick up your box lunch in the Exhibit Hall.

WOMEN DENTISTS’ WINE AND CHEESE GATHERING
Friday, October 25
Join your colleagues at AAID’s Women Dentists’ Wine and Cheese Gathering on Friday, October 25 from 6:00 pm until 7:30 pm. This is a wonderful place to talk with members who share similar challenges and opportunities.

PRESIDENT’S CELEBRATION
Saturday, October 26
Join AAID President, Nick Caplanis and Mrs. Caplanis on Saturday evening, October 26, to enjoy an outstanding meal, say a fond farewell to your friends, dance to some great music, and celebrate AAID and everything you have helped it accomplish. The recipients of the Isaiah Lew Memorial Research Award and the Aaron Gershkoff-Norman Goldberg Memorial Award will be introduced and honored. One ticket is included with each dentist’s registration (except for student and life or retired member registrations) and additional tickets can be purchased for $195.
Slate of Officers
The AAID Nominating Committee presents the following slate of officers for consideration at the Academy’s 2013 Annual Business Meeting on Saturday, October 26, in Phoenix, AZ during the 62nd Annual Meeting.

President — John C. Minichetti, DMD, FAAID, DABOI/ID
(Automatic succession from President-Elect)

President-Elect — John Da Silva, DMD, MPH, ScM, AFAAID

Vice President — Richard Mercurio, DDS, FAAID, DABOI/ID

Treasurer — Shankar Iyer, DDS, MDS, FAAID, DABOI/ID

Secretary — David Hochberg, DDS, FAAID, DABOI/ID

In accordance with Article IX, Section 12 of AAID’s Bylaws, members not nominated by the Nominating Committee may be nominated by petition as follows: Nothing herein contained shall prevent voting members from nominating a candidate provided that the nomination petition is submitted to the chairman of the Nominating Committee or that person’s designee for posting at least 24 hours in advance of the election.

A nominee not announced by the Nominating Committee must include the names of at least twenty voting members on the petition.

The Committee shall obtain a disclosure statement from each candidate nominated by the Committee or by petition and provide this information to the voting members.

Meet David G. Hochberg, DDS, FAAID, DABOI/ID
Dr. Hochberg maintains a dental implant, restorative and cosmetic practice in Atlanta, GA. Since 1984, he has been actively involved in implant dentistry, including both the surgical and prosthetic aspects. He obtained a BS in Microbiology from the University of Florida in 1974 and his DDS from Emory University School of Dentistry in 1979.

He has served a six year appointment to the Admissions and Credentials Board of the AAID and continues to serve as an examiner for both the A & C Board and the ABOI/ID. Currently he serves as the editor of the AAID News.

Dr. Hochberg was named an Honored Fellow in 2004 and received an AAID Presidential Citation, in 2011 for his twelve years of service, as editor of the AAID News. He also holds a faculty appointment as a Clinical Assistant Professor at Georgia Regents University College of Dental Medicine (formerly MCG).
Membership

NEW MEMBERS
The AAID is pleased to welcome the following new members to the Academy. The following members joined between April 6, 2013 and July 2, 2013. If you joined the Academy recently and your name does not appear, it will be listed in the next newsletter. The list is organized by country, by state and then alphabetically by city. Contact your new colleagues and welcome them to the Academy. You may find their contact information online in the members’ section of AAID’s web site. Scan the QR Code to log into the members’ section.

AAID Foundation Auction

There’s no question the Foundation Auction gives you the opportunity to save money on purchases for your office as well as your other interests. The items offered at this year’s AAID Foundation Auction are useful and valuable. The Foundation has obtained such items for your practice as dental implant systems, educational and hands-on training courses. This year the Auction will also include stays at much sought-after vacation spots, collectable art work and a surprise item or two.

Everyone is eligible to bid in the auction! You must obtain a bidding number from the registration desk to participate. You will need to provide credit card information so that any winning bids you make can be charged to your credit card. YOUR CREDIT CARD WILL NOT BE CHARGED UNLESS YOU ARE THE WINNING BIDDER.

How the Auction Works
Information describing auction items will be available at the Annual Meeting registration desk and at the Auction area outside the Exhibit Hall. Table-top easels will feature a photograph/advertisement of each product/service, item number, product description, and name of company or individual that donated the item.

A bid sheet associated with each item will list the minimum starting bid and minimum bidding increments, will have a line for bidders to sign and print their name, write-in a new bid amount and print their bid number assuring a constant update of changing bid amounts. There is no limit to the number of bids a member can enter for any given item; if someone places a higher bid, members may bid again. The highest bid at closing wins the item. AAID/F will charge winning bids to the credit card used to obtain the bidding number.

Written bids will be accepted starting at 10:00 am, Thursday, October 24. All bidding will close at exactly 12:30 pm, Saturday, October 26. The highest bid at closing wins the item. Upon receipt of payment, the AAID/F will notify the donors to deliver items, at their expense, directly to the winning bidder.

ABOI/ID Names New Executive Director

The Board of Directors of the American Board of Oral Implantology/Implant Dentistry has named Latasha Bryant as its new Executive Director. She replaces Kathleen Huttner who resigned after five years to take a new job with a regional oral and maxillofacial dentistry practice.

Latasha is no stranger to AAID, having worked in various capacities for the Academy for most of the past 12 years. She joined AAID in 2000 as Administrative Assistant to the Afshin Alavi, AAID’s Chief Financial Officer. She left in 2007, but after a one-year stint as Contracts Administrator for Constellation New Energy, Latasha returned to the Academy in 2008 and worked as Administrative Assistant to the Director of Education and Credentialing until being hired by the ABOI/ID in June 2013.

She earned a Bachelor of Arts degree from Chicago State University.
