Editor’s Notebook
David G. Hochberg, DDS
Editor, AAID News

The latest data from the 2010 Census shows senior citizens, as a percentage of population, is increasing faster than younger groups. The senior population grew at over 15% and now represents 13% of total U.S. population. This is a key demographic group for implant dental practices. We offer an article in this issue’s Business Bite section to help you market to seniors in not only marketing using social media. The Preliminary Program for AAID's 60th Annual Meeting is in the mail. The Scientific Program includes practical education for the practicing implant dentist and you will definitely gain knowledge that you can take back to your office and use immediately. See pages 16 through 22 for more information.

Realities of Implant Dentistry and How to Stack the Deck in Your Favor

The American Academy of Implant Dentistry is the single best source for practical education for the practicing implant dentist. Join your colleagues in Las Vegas, October 19 – 22, 2011, as we celebrate AAID’s 60th Anniversary Annual Scientific Program.

Learn from the pros that have the knowledge and experience about how to attract and keep new patients, improve your treatment planning, and enhance your skills as an implant dentist. Join over 1,000 of your colleagues and a world-class faculty at one of the best values in implant dentistry.

• Obtain comprehensive implant dentistry CE with choices of different programs
• Interact one-on-one with world-class presenters
• Leave with clinically practical information you can use immediately
• Discover the latest products and services in implant dentistry
• Celebrate 60 years of innovation in implant dentistry

We look forward to seeing you in Las Vegas, October 19 - 22, 2011.

For detailed information about programs and speakers, see pages 16 through 22.
Introducing the Laser-Lok® 3.0 implant

Laser-Lok 3.0 is the first 3mm implant that incorporates Laser-Lok technology to create a biologic seal and maintain crestal bone on the implant collar. Designed specifically for limited spaces in the esthetic zone, the Laser-Lok 3.0 comes with a broad array of prosthetic options making it the perfect choice for high profile cases.

- Two-piece 3mm design offers restorative flexibility in narrow spaces
- Implant design is more than 20% stronger than competitor implant
- 3mm threadform shown to be effective when immediately loaded
- Laser-Lok microchannels create a physical connective tissue attachment (unlike Sharpey fibers)

Customer Care: 888.246.8338 or shop online at www.biohorizons.com

2. Implant strength & fatigue testing done in accordance with ISO standard 14801.
There's good advice and then there's bad advice. From the time we were kids, we have heard a number of pieces of good advice:

- Always look both ways before crossing the street.
- Don't take candy from strangers.
- Buy low, sell high.
- And my favorite – Don’t spit into the wind (Well, maybe spit wasn’t exactly the verb that was used, but you get the idea).

But often, we have been given advice that sounds good, until we really think about it.

For example:

- The grass is always greener on the other side.
- This is going to hurt me more than it will hurt you.
- It is always darkest before the dawn.
- I just read one that falls into the “sounds good” but is in the bad column:

  “If the dentist is recognized by a specialty accreditation organization other than one that has been recognized by the American Dental Association, then the dentist should state that the referenced organization is not recognized as a specialty accrediting organization by the American Dental Association.”

Well, as we in the American Academy of Implant Dentistry know, this is pure garbage.

The AAID has spent 15 years and millions of dollars in the federal and state courts resulting in decisions that specifically overturned such state restrictions when the organization is one that offers bona fide credentials, like the AAID.

As Dr. Frank Recker, the Academy’s legal counsel pointed out to Stuart Oberman, the attorney who wrote the article containing the above quotation that appeared in the April 2011 issue of Dental Tribune:

“In both cases [California and Florida] the courts upheld the right of dentists with AAID and ABOI/ID credentials to advertise them to the public without disclaimers and that these credentials provide valid information from which consumers can assess the qualifications of dental practitioners relative to implant dentistry.”

While members of our Academy benefit from these court decisions, the real beneficiary is the consumer. Providing the consumer with access to dentists who hold a bona fide credential in implant dentistry is valuable for patients.

And that is exactly what we are going to do. The Board of Trustees voted to move forward to fund a plan to develop a campaign that will inform the consumer about the AAID, our credential and the availability of AAID credentialed members as the best resource for dental implants. In addition — and with no begging required — the Board went further and authorized significant funding to develop a new website devoted to providing credible, unbiased information about dental implants to the consumer and as a way to find AAID credentialed members.

I want to personally think Dr. Richard Mercurio, Chair of the Public Relations Committee, for spearheading this strategic undertaking for the Academy. The work is only beginning for Richard and his committee members, Drs. Richard Blustein, Jim D’Alise, William Dapper, and Nick Shubin.

I am excited about where AAID is going. I just returned from attending the Northeast/Southern District
Adults over age 50 have been slower to adopt social media websites like Facebook, Twitter and Linkedin than younger age groups. However, recent studies suggest that use by this demographic group is increasing fairly dramatically.

According to “Social Networking Sites and Our Lives,” a June 16, 2011 Pew Internet and American Life Project study, while the percentage of Internet users age 65 and older on social networking sites is still small, it is rising rapidly. In 2008, those 65 and older represented only two percent of users of social networking sites. By 2010, the number had tripled to six percent of all users. Perhaps more telling, the same study found that over half (52%) of users of social networking sites were over 36 and the average age had increased from 33 to 38 between 2008 and 2010.

Another study of grandparents in the United Kingdom found that 22 percent of those surveyed are using a social media network, like Facebook.

Other studies suggest seniors are getting more comfortable with their online experience as it intersects with their health care, too. A survey conducted by Kaiser Permanente of Medicare eligibles who use its “My Health Tool” to manage their online health information, found that 87 percent had satisfactory experience with the online site, suggesting an increasingly high level of comfort among seniors with online health care information.

The Pew study also uncovered one significant reason why the elderly might be taking to social networking and Internet sites more frequently:

“Older adults are more likely to be living with a chronic disease, and those living with these diseases are more likely to reach out for support online.”

For dentists contemplating reaching this market through social media sites and marketing campaigns, this is welcome news. Historically, marketing to seniors has meant traditional marketing and advertising channels: Yellow Pages, newspaper advertising and direct mail. While all of these can be effective, some dentists may find them to be cost prohibitive, especially for smaller or solo practices.

The June 2011 issue of DentalTown suggests that many dentists are using Facebook to market their practices, and if the comments in the article are accurate, many are doing it with a great deal of success. Once the over 65 demographic reaches a critical mass, it will make using Facebook to reach seniors more practical as Facebook allows you to target account holders by geography and age to ensure your ads are appearing on specific and meaningful account holders Facebook pages.

Facebook’s demographic trends more toward women. Linkedin is a better source to target men as its demographic trends toward the male professional. And its ad targeting choices are almost as vast as Facebooks. Linkedin categories include: Company Size, Job Function, Industry, Seniority, Gender, Age and Geography.

Both online sites’ advertising offerings provide excellent analytics so dentists can track ROI and determine which ads work most effectively. Like a Google Ad Word account, both Facebook and Linkedin ad campaigns use a “pay per click” or “pay per impression” approach that allows you to manage your budget wisely.

In addition to reaching seniors directly through a social media approach, dentists can also consider reaching their caregivers — the so-called sandwich generation. These 35 to 50 year-olds represent a significant and growing demographic with dual responsibilities: caring for their own children as well as their parents. These adults have fully embraced online and social media tools to access health care information.

According to a survey conducted by Aging Info USA, a group that pairs
corporate resources with caregiving needs, new technologies and websites have transformed how Americans alleviate the growing financial and emotional burdens on family members of caring for sick or disabled loved ones.

“The use of new technologies can be a powerful tool to keep seniors independent as long as possible and support family caregivers,” said Susan Avello, vice president and partner for Agin Info USA. She cites a report published by AARP in 2008 that showed that both seniors and family caregivers are seeking new technology products as a way to keep their loved ones living in their home as long as possible. “Caregivers are using technology to deliver, monitor, manage medications, track and coordinate care of their loved ones,” she said.

Dentists have always had close relationships with their patients and this puts them in a position of trust whereby they can provide advice to adult patients, about the oral health needs of their aging parents too. Translating this position from the office to a marketing or promotion campaign is another matter. But dentists have always been among the more innovative health care marketers, and we’ll be looking for examples and case studies to share with our readers in the coming months.

Chris Martin is a social media public relations expert and can be reached by e-mail at chris@chrismartinpublicrelations.com or on Facebook at www.facebook.com/CMPRFanPage or on Twitter at @CMPR or on LinkedIn as Chris Martin. Heck, you can even call him directly at 630-670-2745.

Share your own Facebook, Twitter, or LinkedIn efforts with your fellow members by emailing them to us at info@aaid.com or post them on AAID’s Facebook fan page at www.facebook.com/aaidimplantdentists or tweet about them to @AAID_dentists on Twitter.com.

**Pikos Implant Institute**

Dr. Michael A. Pikos has provided continuing education courses for 20 years with over 2400 alumni from all 50 states and 32 countries, and is internationally recognized as a leader in implant surgery.

“For the dental surgeon who respects the restorative principles of Dawson, Pawkey, Spear, and Koic, and the surgical principles of Marx, Allen, and Misch... this course is a must. The pursuit of dental implant surgical excellence is thriving at the Pikos Implant Institute.”

Dr. Neil Sullivan, OMS, Annapolis, MD
The American Academy of Implant Dentistry Research Foundation (AAIDRF) offers a Clinician Research Grants Program to provide limited support for meritorious dental implant research projects which include, but are not limited to, the following purposes:

- To conduct research which determines the feasibility of a larger research project. This may be described as the conduct of pilot studies of venture research.
- To develop and test new techniques and procedures.
- To carry out a small clinical or animal research project.
- To analyze existing data.

The deadline for the Clinician Research Grant Program application is August 1, 2011. An application form is available online at www.aaid.com. Please submit to Afshin Alavi by e-mail at afshin@aaid.com or by fax at 312-335-9090.

The deadline for the Clinician Research Grant Program application is August 1, 2011. An application form is available online at www.aaid.com. Please submit to Afshin Alavi by e-mail at afshin@aaid.com or by fax at 312-335-9090.

**Slate of Officers**
The AAID Nominating Committee presents the following slate of officers for consideration at the Academy’s 2011 Annual Business Meeting on Saturday, October 22 in Las Vegas during the 60th Annual Meeting.

- **President** — James L. Bush, DDS (Automatic succession from President-Elect)
- **President-Elect** — Nicholas Caplanis, DMD, MS
- **Vice President** — John C. Minichetti, DMD
- **Treasurer** — John Da Silva, DMD, MPH, ScM

**Secretary** — Richard Mercurio, DDS

In accordance with Article IX, Section 12 of AAID’s Bylaws, members not nominated by the Nominating Committee may be nominated by petition as follows:

3) Nothing herein contained shall prevent voting members from nominating a candidate provided that the nomination petition is submitted to the Chairman of the Nominating Committee or that person’s designee for posting at least 24 hours in advance of the election.

4) A nominee not announced by the Nominating Committee must include the names of at least twenty voting members on the petition.

5) The Committee shall obtain a disclosure statement from each candidate nominated by the Committee or by petition and provide this information to the voting members.

**AAID Research Foundation Grant Deadline:**
**August 1 for Clinician Research Grants**

Check out www.aaid.com to get the most out of your AAID membership.
Overflow crowd attends District Meeting

A crowd of over 125 dentists attended the AAID’s Northeast/Southern District meeting held June 10 – 11 in Baltimore. Under the leadership of Dr. Richard Grubb, Chair of the Northeast District, the other officers of the two Districts put together an outstanding scientific program on the topic of “Rescue of the Ailing Implant.”

Those in attendance were treated to a full day program entitled “Digging Out of Problems” presented by Dr. Alfred “Duke” Heller and his son, Dr. Robert Heller. On the second day, Dr. David Vassos presented his motivational program “Minimal Stress, Maximum Success.”

The meeting wrapped up with an outstanding presentation by Dr. Edgard El Chaar on peri-implantitis. Be sure to mark your calendar for the 2012 Southern/Northeast District meeting to be held in Jamaica at the all-inclusive Hilton Rose Hall Resort in Montego Bay. The dates are January 26 – 28, 2012. More information is available online.

Drs. Duke and Robert Heller present cases to an overflow crowd.

Over half of those in attendance reported making a purchase from one of the 14 exhibitors during the meeting.

Upcoming Key AAID Dates

**OCTOBER 2011**
19 – 22  60th Annual Meeting
Las Vegas, Nevada

**JANUARY 2012**
26 – 28  2012 Southern and Northeast District Meeting
Montego Bay, Jamaica

**FEBRUARY 2012**
3 – 4  ABOI/ID Implantology Update and Comprehensive Board Review Course
Chicago, Illinois

**JUNE 2012**
8 – 9  2012 Western and Central District Meeting
Vancouver, Canada

President’s Message
continued from page 3

Just when you thought it was safe, I’m going to give you the shameless plug for this year’s AAID Annual Meeting. Check out pages 16 through 22 for detailed information about the meeting, which will be held October 19 – 22 in Las Vegas. By now you should have received the preliminary program for the meeting in the mail. We have assembled a group of presenters second to none who will examine with you the realities of implant dentistry. I look forward to seeing you in Vegas.

Check the AAID Online Calendar using this QR Code for a complete listing of all Key AAID Dates.
AAID Foundation Supports Dental Lifeline Network

The AAID Research Foundation has contributed $5,000 to the Dental Service Program (DSP) operated by the Dental Lifeline Network, formerly known as the National Foundation of Dentistry for the Handicapped. The gift from the AAID Foundation supports volunteer dentists and dental laboratories participating in the DSP program.

Nationwide, some 15,000 dentists, including many AAID members, offer their services to DDS chapters in all 50 states. They agree to donate comprehensive treatment to one or two needy or aged patients a year. The volunteer dentists treat DDS patients in their own offices and use laboratories that support the program. Costs for lab services for disadvantaged patients, who often have gone without dental care for many years, sometimes is more than the labs can afford to donate. In these cases, DDS picks up the cost for remaining lab balances.

According to Larry Coffee of Dental Lifeline, more than 17,000 people are on the DDS waiting list. Many are disabled and elderly and suffer from serious dental problems because they cannot afford treatment. Medicare does not cover dental treatment and Medicaid offers limited coverage. Few dentists accept Medicaid, however. Those patients who can work usually earn just enough to afford basic necessities.

“Not only do these deserving individuals endure constant, bothersome pain but their dental problems impact their diets, ability to communicate and overall quality of life and self esteem. Most of them have nowhere to go for assistance,” said Coffee. “AAID's generous donation will help us recruit and support volunteer providers as well as engage more AAID members who have already donated their time and talents.”

“The AAID Foundation is pleased and honored to provide financial help to the Dental Lifeline Network and show support to AAID members who generously volunteer their services to help disadvantaged men, women and children obtain the dental care they desperately need,” said John Minichetti, DMD, chairman, AAID Research Foundation.

The DDS program has been endorsed by 15 prominent national dental organizations, AAID included, and 45 state dental associations.

Actions Taken by Board of Trustees

June 11, 2011, Baltimore, Maryland

• Accepted the Public Relations proposal to develop a business plan for a marketing campaign to be presented to the Board at the October 18, 2011, meeting.
• Authorized funding to begin the development of an upgraded, updated website to support the marketing plan.
• Approved funding to complete the video portion of the AAID History (“Pioneers Project”).
• Accepted the 2010 audit as presented and named Ruzicka and Associates as the auditors for fiscal year 2011.
• Reappointed JP Morgan to manage AAID’s investment portfolio for the coming year.
• Provided up to $20,000 in fiscal 2011 to ABOI/ID to meet their reserve requirement of $40,000.
• Loaned the Central District $5000 to enable them to share in the expense and income for the 2012 Western/Central District Meeting.
• Established an AAID auto travel reimbursement policy based on the IRS Rules for Business Travel.
• Approved changes in publishing the JOI by adding 300 pages of electronic online-only content and adding a “flip digital magazine format in addition to six regular issues per year plus a special seventh issue.
• Authorized staff to review and evaluate additional publishers for the JOI.
• Decided to hold the June 2012 Board meeting in Vancouver in conjunction with the Western/Central District Meeting.
• Elected the Fellows and Associate Fellows as recommended by the A&C Board.
• Approved the Peabody Orlando (Florida) as the site for the 2014 Annual Meeting.
• Removed 20 unpaid credentialed individuals from AAID membership.
• Directed the Membership Committee to come back to the Board with a recommendation for a new membership category that for individuals who have completed the MaxiCourse® and completed Part 1 of the exam.
• Approved up to $7500 in funds from the Annual Meeting budget to develop an app for the Meeting.

The ABOI/ID offers new educational opportunity

The ABOI/ID announces a program for the experienced implantologist and for those preparing to take the ABOI/ID Board examinations entitled: ABOI/ID Implantology Update and Comprehensive Board Review Course. The program will be held Friday and Saturday, February 3-4, 2012, in Chicago. Speakers for the program will be James L. Rutkowski, PhD, DMD, and Aladdin Al-Ardah DDS, MS. Both speakers are Diplomates of the ABOI/ID. They will provide attendees with up-to-date and scientifically proven information relating to implantology today.

Registration forms and information will be posted on the ABOI/ID website (www.aboi.org) in mid-July 2011. For more information, feel free to call the ABOI/ID Headquarters at 312-335-8793.

This course is neither mandatory nor recommended as the official guide by the American Board of Oral Implantology/Implant Dentistry (ABOI/ID) and thus should not be construed as an official guide in the preparation for any certifying board examination.

Think Sharp.
Finally a drill-sharpening service for dental implant providers.

• Superior performance
• Improved care
• Exceptional longevity
• Unsurpassed quality
• Lower cost
• Increased ROI

Dr. Nordquist authors “The Silent Saboteurs”

In 2009, William Nordquist, DDS, MS published *The Stealth Killer*, a book that has become known as the #1 authoritative resource on the hugely important connection between oral spirochetosis and chronic inflammatory disease.

Now, after having spent additional countless hours in deep study of the topic with co-author David Krutchkoff, DDS, MS, *The Silent Saboteurs* is here to expand on this ground-breaking subject.

This is a story about a very special group of bacteria; uniquely different and interesting microbes that live within our mouths. These peculiar forms of life, known collectively as oral spirochetes, are unknown to most and misunderstood by nearly all.

According to Dr. Nordquist, “We have a story to tell concerning a proposed role these microbes play as saboteurs of our body defenses if allowed to penetrate our external surfaces thereby gaining access to the forbidden territory of our vulnerable internal body fluids. The ways, means and hows, are going to be presented along with rationales and suggestions of strategies by which these bacteria can be countered and what this will mean in terms of a better overall quality of life and savings to our health-care system. Prepare for an interesting read!”

The book is available online from BioMed Publishing Group at www.lymebook.com/silent-

25th Annual Ski Symposium

“Revisit Our Past and Looking To The Future!”

March 5-9, 2012 in Park City, Utah

We are very excited to this year’s Ski Symposium at The Lodge on Mountain Village! This year...if you book your room by Sept 1, 2011.

Stay 4 nights & get the 5th FREE! The Lodge ideally located on Park City Resort Village Plaza, you’ll feel right at home in The Lodge’s hotel room, studios or a 1 to 4 bedroom condominium. It is poised to be a great week of learning, relaxing and connecting with colleagues from around the country!!!

Limited Attendance! Register NOW!

Speakers:

• Michael Elster: Practice Transitions
• Parker Garlitz: How to Expand Your Practice Using Effective Web Presence
• Justin Mangelsdorf: Advances in Clinical Applications with CO2 Lasers for Dentistry
• Joel L. Rosenlicht, D.M.D. Bone Grafting, Guided Surgery and other speakers . . .

**Astrazeneca to Sell Astra Tech Business to Dentsply International Inc.**

Astrazeneca today announced that it has agreed to sell its Astra Tech business to DENTSPLY for approximately $1.8 billion in cash.

Astra Tech, headquartered in Mölndal, Sweden, has two main business divisions: a dental division, which is engaged in the research, development, manufacturing and marketing of dental implants, and a healthcare division, a business focused on medical devices for use primarily in urology and surgery. In 2010, Astra Tech recorded worldwide revenue of $535 million and normalized EBITDA of $105 million, with net assets valued at approximately $300 million at May 2011 rates of exchange.

The transaction is anticipated to be completed during the second half of 2011, subject to receipt of relevant regulatory clearances.

**DENTSPLY Tulsa Dental Specialties Launches New e3™ Torque Control Motor**

DENTSPLY Tulsa Dental Specialties introduced e3™, a new torque control motor designed for rotary and reciprocation instruments.

The e3™ motor was designed with simple operation in mind. Its quiet operation and large, clear and easy-to-read display is pre-programmed for the WaveOne™ reciprocating file as well as all of the other DENTSPLY Tulsa Dental Specialties’ file settings including, but not limited to: ProFile® Vortex®, ProTaper® Universal and PathFile®, plus 15 other programmable settings.

Other features include:
- Rotary and reciprocation function
- Preprogrammed with popular file system settings
- Operates on battery or AC power
- 6:1 contra-angle included (e-type)
- Speed setting from 250-1000 rpm in rotary mode
- Torque settings from 20-410 g-cm in rotary mode
- Auto-stop, reverse (ASR) and forward in rotary mode

For more information or to purchase the e3™ torque control motor, please visit www.tulsadentalspecialties.com or call 1-800-662-1202.

**Gendex® Joins Social Media!**

Gendex Dental Systems announces that it can now be found on the social media sites of Facebook, Twitter, and YouTube. Gendex also has a new Blog site. The Gendex social media pages are intended to directly engage the dental community with the latest news in the industry, improvements in x-ray technology, and the present and future states of Gendex products. The sites will offer a series of regular updates from Gendex, plus gives Facebook users the chance to interact with Team Gendex.

The Gendex social media site pages can be found at:

- Facebook: www.facebook.com/Gendex
- Twitter: twitter.com/Gendex
- YouTube: www.youtube.com/Gendex
- Blog Site: www.gendexdental.com

Learn more about the full line of Gendex products at www.gendex.com.

**i-CAT® Puts Clinicians in Control with Quick Scan**

Imaging Sciences International is pleased to offer Quick Scan, the lowest available dose 3D scan of the full dentition. Quick Scan is one of many proprietary tools that allow general dentists, orthodontists, oral surgeons, and other specialists to maximize the clinical information they need while maintaining the ability to control radiation exposure to the patient.

With Quick Scan, the entire patient dentition can be imaged in 3D for only 27 uSv — the lowest dose for the capture of both arches offered by any Cone Beam manufacturer in the dental market. This dose compares favorably to a typical digital panoramic scan of 24 uSv yet offers full three-dimensional radiography of both arches that provides accurate and distortion-free views not available with 2D panoramics.

Especially useful in orthodontics, the Quick Scan cephalometric-height mode captures all anatomy, from chin to nasion — landmarks required for orthodontics — in 3D for 45uSv. These Quick Scan
options provide dramatically more information for initial workups and progress checks than 2D pans and ceps while still maintaining a comparable level of dose. They also provide sufficient data to fully investigate the TMJ complex and airway in three dimensions.

Patient radiation can be further reduced using i-Collimator which allows clinicians to limit the size of the image to the area of interest. This dose-controlling adaptable feature fully restricts radiation at the x-ray source to scan only the pre-selected areas of interest thereby eliminating exposure to the anatomy outside the field of view.

When panoramics are indicated, the unique feature, i-PAN™, delivers traditional 2D panoramic images. This patented function that uses the i-CAT’s 3D sensor for 2D capture, offers dentists a true two-in-one system that captures 2D and 3D images without the need to invest in two separate sensors or two separate machines.

In addition to dose management capabilities, i-CAT offers other proprietary tools to deliver consistently impressive image quality. Patented Quantum iQ™ image processing technology provides smooth views of soft tissue and crisp visualization of hard tissue and bone structures for maximum detail and contrast. i-CAT’s Ergonomic Stability System (ESS) provides optimal patient stability to minimize movement further driving better image quality results.

For more information on the low dose Quick Scan, and i-CAT features for effective 3D treatment planning, visit www.imagingsciences.com.

**60TH AAID ANNUAL MEETING  | LAS VEGAS 2011**

---

**AMERICAN ACADEMY OF IMPLANT DENTISTRY**
2011 Annual Meeting Scientific Programs

Wednesday, October 19, 2011
New Trends, Techniques and Technology
• The Survival of Ultrashort Locking Taper Implants / Rainier Urdaneta, DDS
• The Various Uses of Acellular Dermal Grafts (ADGs) for Hard and Soft Tissue Grafting / David H. Wong, DDS
• Missed Diagnosis Using Conventional 2D Radiography / Daniel McEwen, DDS
• “Tips and Tricks” For Single Tooth And Partially Edentulous Replacements / Jack Hahn, DDS
• Application Specific 1-Piece Implants / Gerald A. Niznick, DMD, MSD
• Using CAD Technology to Facilitate Implantology / Peter Hunt, BDS, MSc
• Immediate Placement of Mandibular Molar Implants / Dan Holtzelzau, DDS
• Novel Approaches for Simple Socket Regeneration / Robert A. Horowitz, DDS
• The Biologically-Driven Implant System / Jack T. Krauser, DMD
• True Restoratively-Driven Implant Dentistry through 3-D Planning / Scott D. Ganz, DMD
• The True Root-Form Implant for Predictable Implant Success / Barry Levin, DDS
• Immediate Loading — Expanding Application with New Implant Design / Tae Kim, DDS
• Is Autogenous Bone Still the Gold Standard Material for Bone Grafting Procedures in Implant Dentistry? / José E. Pedroza, DMD, MSc

Thursday, October 20, 2011
Main Podium Presentations
• Finding the Right Patient — It Takes More than an Ad / James R. McAnally, DDS
• The First Visit for the Patient — Your Only Chance at the First Impression / Bill Blachford, DDS
• Implant Complications: Methods to Reduce Biomechanical Factors. Key Implant Positions, Implant Number, and Implant Size / Carl E. Misch, DDS, MDS, PhD (h.c.)
• Comprehensive Implant Dentistry Using 3-D Imaging: Reduce Complications, Increase Confidence, Achieve Excellence / John Russo, DDS, MHS
• Treatment Planning - Implants Versus Root Canal Therapy: Read, Analyze, and Then Decide / Jaime L. Lozada, DDS
• The Case Acceptance Appointment - What to Do Starting Next Week / Robert B. Willis, DDS

CONCURRENT SESSIONS
Workshops
• W1: Predictable Socket Regeneration: 3-D Diagnosis, Patient Education, Techniques, and Materials / Robert A. Horowitz, DDS
• W2: (PRF) Platelet-Rich Fibrin … Re-programming the Biology of the Osteotomy Site / Achille Peivandi, DDS, and Robert Miller, MA, DDS
• W3: Fundamentals of Systematic and Ethical Selling for Treatment Plans above $10,000 / James R. McAnally, DDS
• W4: NobelClinician™: Digital Diagnostics and Treatment Planning / Thomas J. Balshi, DDS, and Stephen F. Balshi, MBE

Clinical Round Tables
• RT1: It’s More than Just Money: Personal Aspects of Selling Your Practice / Bill Blachford, DDS
• RT2: Techniques and Materials for Ridge Preservation and Implant Site Development / Barry Barbee, DDS, MD
• RT3: “Tunnel Grafting Procedure” to Gain Mandibular Bone Width / Alfred “Duke” Heller, DDS, MS, and Robert Heller, DDS

Allied Staff Programs
• Realities and Myths of Implant Dentistry: Introduction to the Program / Matthew Young, DDS
• Implant Connections: An In-depth Look at Implant Prosthetics for Staff / Nicole Wardstrom
• Important Considerations in the Staff’s Role for Implant Surgery / John Minichetti, DMD

Friday, October 21, 2011
Main Podium Presentations
• Extract and Graft — Implant Later / Suzanne Caudry, DDS, PhD
• Extract and Implant / Paul S. Petrungaro, DDS, MS
• Implants for Immediate Function — Fact or Fiction / Jack A. Hahn, DDS
• Implants for Removable / Michael A. Pikos, DDS
• Risk Assessment in the Esthetic Zone / André P. Saadoun, DDS, MS
• Soft Tissue Esthetics and Health with Dental Implants: Ten Key Criteria for Success / Sascha A. Jovanovic, DDS, MS

see Annual Meeting p. 18
WHEN NO TWO CASES ARE THE SAME IT’S NICE TO KNOW THE SOLUTION ALWAYS IS.

LOCATOR® The Versatile, All-Inclusive Overdenture Attachment System.

**Implant Attachment**
The LOCATOR Implant Attachment with patented pivoting technology is the premier system for implant-retained overdentures. According to recent studies, a two implant-retained, tissue-supported overdenture restoration is considered the new minimum standard of care for edentulous patients. More than two implants may also be placed for an implant-supported overdenture.

**Bar Attachment**
When a case calls for an overdenture bar, the LOCATOR Bar Attachment provides the same pivoting technology, self-aligning feature, superb retention, and exceptional durability, all in a low-profile design. It offers three options for the fabrication of a resilient attachment on an implant-supported cast alloy or milled titanium bar.

**Root Attachment**
When root canaled teeth can be prepared for placement of attachments to retain an overdenture, the LOCATOR Root Attachment delivers great versatility. Its supra-radicular design gives you the choice of a straight post and 10- or 20-degree angles to accommodate divergent roots, as well as a special cast-to version.

For more information download a QR app to scan this code, visit our new microsite at www.thepivotingdifference.com/AAID, or please call 1.800.262.2310.

Annual Meeting
continued from page 16

Spanish Program
(Simultaneous translation from Spanish to English will be provided.)
• The Zygomatic Anatomically Guided Approach (ZAGA) / Dr. Carlos Aparicio
• Implantology from the Simple to the Complex / Dr. José Luis Rafel Amato
• Computer Guided Implant Dentistry: Where Are We Now and Where Are We Going to Be in the Near Future? / Alvaro Ordonez, DDS
• From Surgery to Prosthodontics: Hard and Soft Tissue Management (Cortical Splits and Immediate Prosthesis) / Dr. Norberto Manzanoares Mayandia
• Evaluation of the Maxillary Sinus Augmentation with Lateral Access and actualization with Guided Tissue Regeneration Concepts / Dr. Alejandro Padrós Fradera
• The Prosthetic Guided Treatment Plan: The Key to Success in Implantology / Juan Manuel Vadillo Martin, DDS
• Immediate Loading and Immediate Implants: Techniques and Indications / Ricardo Mitralani, DDS, MSD

CONCURRENT SESSIONS
Workshops
• W5: NobelClinician™: Digital Diagnostics and Treatment Planning / Thomas J. Balshi, DDS, and Stephen F. Balshi, MBE
• W6: Soft Tissue Management Around Teeth — Hands-on with Pig Jaws / André P. Saadoun, DDS, MS
• W7: Immediate Placement of Mandibular Molar Implants / Dan Holtzclaw, DDS

Clinical Round Tables
• RT4: Treatment Planning — Implants Versus Root Canal Therapy: Read, Analyze, and Then Decide / Jaime L. Lozada, DDS
• RT5: Avoiding the Pitfalls of Immediate Function (Controlled Functional Osteocompression) / William Locante, DDS

Allied Staff Programs
• Understanding Diagnostics for Implant Patients / Natalie Wong, DDS
• Implant Prototype Restorations: The Key to Long-Term Success / Matthew R. Young, DDS
• The Hand-Off / Bill Blatchford, DDS
• Pre-surgical, Surgical and Post-Op Assistance with Implant Surgery / James Ruthkowski, DMD, PhD

Saturday, October 22, 2011
Main Podium Presentations
• Regenerative and Esthetic Techniques in Implant Surgery: Clinical Applications with Recombinant Growth Factors / Marc J. Nevins, DMD, MMSc
• Enhancing Outcomes with Block Bone Grafts / Craig M. Misch, DDS, MDS
• Avoiding and Managing Esthetic Implant Complications / Anthony G. Sclar, DMD

CONCURRENT SESSIONS
Workshops
• W8: Botox and Dermal Filler / Pankaj pal Singh, DDS
• W9: Comparison of Lateral Window Preparation for Sinus Lift Procedures Rotary Bur, Piezosurgery, Controlled Drilling Depth Instrumentation / Alfred “Duke” Heller DDS, MS, and Robert Heller, DDS, MS

Clinical Round Tables
• RT6: Development of the Bone Foundation of Implants / Joel Rosenlicht, DMD
• RT7: Immediate Implant Placement into Infected Sites: Bacterial Studies of the Hydraulic Effects of the YSGG Laser / Edward R. Kusek, DDS

Allied Staff Programs
• Keeping the Flame Alive / Tina Calloway, CDA

Nanotechnology for Bone Regeneration

Nanogen

Starting at US $55.00

Testimonial

NanoGen serves as an excellent bone graft product to treat molar extraction sockets in my patients. Up to 60% new bone was observed in the sockets grafted with NanoGen of which 100% was vital bone. Implants are subsequently placed in the healed sockets and have also shown a 100% success rate one (1) year post implantation.

I highly recommend using NanoGen for the treatment of extraction sockets.”

Ziv Mazor, DMD
Private Practice,
Ra’anana, Israel

- First Nanotechnology-Based Bone Graft
- Particles Composed of Nanocrystalline Calcium Sulfate
  - Particles composed of nanocrystalline calcium sulfate grains manufactured using proprietary technology.
- Biodegradable, Osteoconductive, Guided Bone Regeneration Material
  - As it undergoes controlled degradation, NanoGen encourages mineralization of newly regenerated bone.
- Simple to Use, Extremely Cost Effective
  - Add saline to NanoGen to form a putty, graft it into the defect and close the defect.
- NanoGen Can Be Used Alone or in Combination with Other Bone Grafts

High magnification SEM of NanoGen particles showing the nanocrystalline structure of the grains.

NanoGen grafted in molar extraction socket.

Clinical picture showing well regenerated bone 6 months following socket grafting.

Histology section of regenerated vital bone obtained 6 months after extraction socket grafting with NanoGen.

Periapical radiograph showing extraction socket

Periapical radiograph showing implant, abutment and crown 4 months after implant placement. Good bone density and height are observed.

To place an order call 877-336-8643 or visit http://shop.orthogenecorp.com
Camaraderie and Networking Opportunities

**Continental Breakfasts**
Start each day of the meeting on the right foot with a continental breakfast. This is an excellent opportunity to share information with your peers before attending a scientific program. Continental breakfasts are open only to registered attendees. Badges will be required.

**Networking/Refreshment Opportunities**
Take a break from formal learning to continue discussions with colleagues during the twice-daily refreshment breaks. Examine what is available to the implant dentist at the Implant World Expo in the Exhibit Hall. Enjoy refreshments while sharing information with colleagues and suppliers. Badges will be required.

**Welcome Reception**
**Wednesday, October 19**
All registrants and registered guests are invited to attend the Welcome Reception on Wednesday, October 19 from 5:30 pm – 7:00 pm. This is a wonderful opportunity to reconnect with old friends and make new ones from the implant profession in a relaxed atmosphere while enjoying light appetizers and beverages of your choice. Badges will be required.

**Implant World Expo Lunch**
**Thursday, October 20**
No need to look for a restaurant, worrying if you will be finished in time for the start of the afternoon education session. Join your colleagues on Thursday, October 20 from Noon until 1:30 pm in the Exhibit Hall for a FREE lunch and visit with the suppliers who help make your practice successful. Every registrant will receive a ticket for lunch.

**District Caucuses Lunch**
**Thursday, October 20**
Meet your fellow members who practice in the same geographic area and enjoy a box lunch while discussing AAID business. This event is open to all AAID members – credentialled or general – although, only credentialled members may cast votes. This is an excellent way to become involved in the workings of the Academy and develop new contacts in the profession. Each District will meet in a different room for lunch and conversation on Thursday, October 20 from Noon until 1:30 pm. There is no cost for this event. Pick up your box lunch in the Exhibit Hall.

**Celebration of Credentials**
**Thursday, October 20**
Celebrate success in implant dentistry as AAID recognizes members who attained the level of Fellow, Associate Fellow, or ABOI/ID Diplomate. Congratulate AAID’s newest credentialled members and learn what it takes to join their ranks. This will occur at the close of the Main Podium Presentations on Thursday, October 20.

**Women Dentists’ Wine and Cheese Gathering**
**Thursday, October 20**
Join your colleagues at AAID’s Women Dentists’ Wine and Cheese Gathering on Thursday, October 20 from 6:00 pm until 7:30 pm. This is a wonderful place to talk with members who share similar challenges and opportunities.

**Implant World Expo Reception**
**Friday, October 21**
Join colleagues and suppliers to the implant profession in the exhibit hall for the Implant World Expo. Over 120 suppliers to the implant dentistry profession will be there. Chat with fellow professionals while enjoying hors d’oeuvres and cocktails. This outstanding event is open to all registered guests (badge required) and will be held from 5:30 pm until 7:00 pm on Friday, October 21. Badges will be required.

**President’s Celebration**
**Saturday, October 22**
Join AAID President and Mrs. Orrico on Saturday evening, October 22, to enjoy an outstanding meal, say a fond farewell to your friends, dance to some great music, and celebrate AAID and everything you have helped it accomplish during its first 60 years. The recipients of the Isaiah Lew Memorial Research Award and the Aaron Gershkoff Memorial Award will be introduced and honored. One ticket is included with each dentist’s registration (except for student registrations) and additional tickets can be purchased for $195.
Simply Smarter Implant Solutions

Industry compatible implants with All-in-1 Packaging for Value
Implant Direct Sybron continues to transform the Implant Industry with the broadest selection of implants, offering surgical & prosthetic compatibility with other major brands. Our patented combination of micro-threads for crestal bone preservation & double-lead threads for faster insertion simplify surgery & increase initial stability, essential for immediate load applications.

Zirconia Abutments on Titanium Bases for Esthetics and Strength
The titanium base is anodized gold to mask the grey color & can be used in the fabrication of cad-milled custom abutments. The stock abutments, provided assembled, are offered in 0°, 8° & 15° angulations with contoured margin collars of 1mm & 2mm heights. The Zirconia can be modified intra-orally with diamond burrs, providing the benefits of custom zirconia abutments for a fraction of the cost.

Joining our full line of industry compatible prosthetics
See the considerable savings for our most popular abutments

Find the simply smarter solution that fits your practice.

Main Podium Speakers

BILL BLATCHFORD, DDS
• Spoken at every major dental meeting in the US and has lectured frequently internationally
• Author, Dentist’s Mighty Guide Book, Playing Your ‘A Game, and Blatchford BLUEPRINTS

SUZANNE CAUDRY, DDS, PHD
• Private practice specializing in periodontics and implant dentistry
• Associate in Dentistry, Department of Periodontology, Oral Reconstruction Unit, University of Toronto, Ontario, Canada

JACK HAHN, DDS
• Diplomate, American Board of Oral Implantology/Implant Dentistry
• Honored Fellow, American Academy of Implant Dentistry
• Fellow, Academy of General Dentistry
• Private practice limited to implant surgical placement and restoration

SASCHA A. JOVANOVIC, DDS, MS
• Lecturer and Course Director, Implant Dentistry, UCLA
• Continuing Dental Education
• Academic Chair and Founder of gIDÉ
• Editor-in-chief, Implant Tribune

JAIME LOZADA, DDS
• Professor and Director, Graduate Program in Implant Dentistry, Loma Linda University
• Fellow, American Academy of Implant Dentistry
• Diplomate, American Board of Oral Implantology/Implant Dentistry

JAMES R. MCANALLY, DDS
• CEO, Big Case Marketing
• Fellow, Academy of General Dentistry
• Author, dentistry’s only guidebook related to reconstructive case promotion

CARL E. MISCH, BS, DDS, MDS, PHD (HC)
• Clinical Professor and Director of Oral Implantology, Temple University School of Dentistry, Department of Periodontology
• Diplomate, American Board of Oral Implantology/Implant Dentistry
• Fellow, American Academy of Implant Dentistry
• Co-inventor, BioHorizons Dental Implant System

CRAIG M. MISCH, DDS, MDS
• Clinical Associate Professor, New York University, Department of Implant Dentistry
• Dual specialist in Prosthodontics and Oral Maxillofacial Surgery
• Faculty appointments at the University of Pittsburgh and the University of Florida

MARC L. NEVINS, DMD, MMSC
• Private practice of periodontics and implant dentistry
• Assistant Clinical Professor of Periodontology at the Harvard School of Dental Medicine
• Diplomate of the American Board of Periodontology
• Co-Editor of The International Journal of Periodontics and Restorative Dentistry

PAUL PETRUNGARO, DDS, MS
• Private practice periodontics and implantology
• Fellow, International and American College of Dentists
• Contributed many innovations in surgical dentistry

MICHAEL PIKOS, DDS
• Diplomate, American Board of Oral and Maxillofacial Surgery
• Diplomate, American Board of Oral Implantology/Implant Dentistry
• Founder and CEO, Pikos Implant Institute
• Private practice limited to implant surgery

JOHN RUSSO, DDS, MHS
• Private practice, periodontist
• Clinical Assistant Professor, Medical University of South Carolina, Division of Periodontics
• Course Director, Hands-on Cadaver Bone and Soft Tissue Grafting Course, Medical University of South Carolina

ANDRÉ P. SAADOUN, DDS, MS
• Diplomate, American Academy of Periodontology
• President, “Rencontres Méditerran éennes de Dentisterie”
• Recipient, French Medal “Chevalier de l’Ordre National du Mérite”
• Private practice limited to esthetic periodontics and implant surgery

ANTHONY SCLAR, DMD
• Founder, Integrated Seminars; Director of Education, Sclar Center for Empowered Dental Implant Learning
• Editor, dental implant surgery section, Journal of Oral and Maxillofacial Surgery
• Director, Clinical Research and Post Graduate Dental Implant Surgery, Department of Oral and Maxillofacial Surgery, Nova Southeastern University School of Dentistry

ROBERT B. WILLIS, DDS
• Founder, Dentalcoach.com and PromoteYourPractice.com
• Lecturer at numerous associations and dental organizations on building well-run, profitable dental practices
• Private coach to progressive dentists

NobelActive™
Designed to maximize bone and soft tissue volume.

NobelActive equally satisfies surgical and restorative clinical needs. Its back-tapered coronal design, together with the built-in platform shifting, is designed to maximize crestal bone and soft tissue volume. Its implant body and thread design progressively condenses bone during insertion enhancing initial stability. In addition, the drilling procedure is designed to retain as much bone as possible. The versatile and secure internal conical connection and a comprehensive implant and prosthetic product assortment allow clinicians to produce excellent esthetic results.

Nobel Biocare is the world leader in innovative and evidence-based dental solutions. For more information, contact a Nobel Biocare Representative at 800 322 5001 or visit our website.
